HISTORIC STYLE LOG HOMES

Hearthstone was founded in 1971 as a restorer of 200 year old log homes. Over the years, we have developed log home systems that reflect the heart and soul of those old structures, yet with continually evolving technical and aesthetic improvements. From cabins to huge lodges.

Huge logs of long lengths, with dovetail corners, high-tech chinking between logs, and a host of surface finish options such as hand hewn, WeatherAged, chamfered, planed and hand-planed. Broad interior design options: from modern rustic, to eclectic, to historical, to western.

TIMBER FRAME HOMES

Hearthstone specialty since 1984. Timber Frames are built with massive timbers and a dizzying array of intricate, hand-pegged, mortise-and-tenon joinery. Creative finishes: planed, hewn, WeatherAged, distressed, or any combination.

The stunning frame, a descendant of centuries-old methods, is then married to a high-tech, extremely tight and energy efficient blanket of structural insulated panels. The result is a highly personalized home of unmatched beauty, value, energy efficiency, and total design flexibility.

MODERN STYLE LOG HOMES

Visually, log homes tend to separate into two broad options. One is the historic style with dovetail corners and chinking, that you see on our Historic Style Log Homes page. The other, which you see on this page, is an unchinked, or minimally chinked, style that sometimes has a modern look to it.

These homes can have a hand crafted or hand hewn look, or they can have a more modern machined and planed look. At Hearthstone, we have unique abilities to do this type of home in long logs, dovetail corners if desired, superior detailing, and with impressive timbered roof and floor systems.
