Hearthstone

There is little in this world more satisfying

than an extraordinary living environment. Hearthstone specializes in the conversion of your unfinished visions into a very real and very extraordinary home.

There are different ways to create such a home, but at Hearthstone we do it with timber. The centuries-old art and trade of the *Timberwright* is *our* art and trade.

By combining the skills of the Timberwright with one of nature's finest gifts – massive timbers – we design, craft, deliver, and erect absolutely stunning, truly extraordinary living environments. *That is our passion; it is our reason for being; and it is our business.*

This is a hectic world full of compromise and indifference. We at Hearthstone do not like compromise and we are not indifferent. We have some firm convictions that have not wavered since our beginnings in 1971.

WE ARE DEDICATED TO, AND NEVER CEASE TO BE AMAZED BY THE TIMBERWRIGHT. Somewhere between iron worker and cabinet maker, the fruits of his labor still grace the land and sea – with life spans measured in centuries: bridges, churches, barns, log homes, timber frame homes, taverns, courthouses, inns, hotels, sailing vessels, and – with good fortune and hard work – your family home.

WE BELIEVE THAT THERE ARE FAR BETTER WAYS to build homes than are commonly used today. We believe that any person who wants a home of imagination, distinction, character, and technical excellence is best served at Hearthstone.

WE BELIEVE THAT A BUSINESS SHOULD DELIVER wisdom, competence, and integrity to its clients. We hold ourselves to those high standards, and we have an unprecedented and unmatched money-back guarantee to reflect those standards.

THANK YOU

FOR TAKING THE TIME TO REVIEW OUR PORTFOLIO. IN JUST A SHORT TIME, WE HOPE TO ACCOMPLISH THE FOLLOWING OBJECTIVES:

TO INTRODUCE YOU TO THE HEARTHSTONE SKILLS, PHILOSOPHY, CULTURE, AND HISTORY.

TO SHOW YOU PHOTOGRAPHY OF SOME EXTRAORDINARY LIVING ENVIRONMENTS.

TO INTRODUCE YOU TO OUR VARIOUS PRODUCTS AND SERVICES.

TO HELP YOU THROUGH THE FIRST STEPS OF NARROWING YOUR DESIGN IDEAS.

TO INVITE YOU FOR A DESIGN INTERVIEW, WHERE WE WILL BEGIN THE PROCESS OF PUTTING YOUR SPECIFIC HOME ON PAPER.

IN ADDITION TO THIS PRINTED MATERIAL, WE HAVE AN INTERACTIVE CD THAT WE HIGHLY RECOMMEND. THE ELECTRONIC MEDIA IS MUCH EASIER TO KEEP CURRENT AND DETAILED. IF YOU DO NOT HAVE ACCESS TO A COMPUTER WITH WHICH TO REVIEW THE CD, WE STRONGLY RECOMMEND THAT YOU COME VISIT US TO DO SO (OR, WE WOULD BE HAPPY TO VISIT YOU).

AT ANY TIME, PLEASE CALL FOR FURTHER ASSISTANCE.

Fulfillment

The man who built this house of mine
A hundred years ago,
With Christian doors of smooth clear pine,
And chestnut timbers, row on row,
Whose oxen hauled the brick and lime,
Who squared the hearth's broad stone,
Could not foresee that Fate and Time
Would someday make it all my own.

Of course, he knew that it would stay
Here, on its sturdy sills,
Long after his last Spring should lay
Her fragrant mornings on the hills.
So even if he did not know
Just who its owners were to be,
I'll still maintain that, years ago,
He planned and built this house for me.

Frederick W. Branch

WE WORK RELENTLESSLY TO IMPROVE THE COSTS and efficiency of our products and services so that we can deliver them to you at the lowest possible price, consistent with our high standards.

LIVING THIS PHILOSOPHY FOR DECADES HAS BEEN REWARDING. We have been recognized by radio, newspapers, magazines, television, and professional organizations across this country. We have been recognized for projects ranging from simple guest houses to log and timber mansions to stunning restaurants and lodges to complex multi-unit commercial projects. But most important, we have been recognized by thousands of loyal customers – and we thank them.

WE HOPE WE ARE GRANTED THE OPPORTUNITY AND RESPONSIBILITY TO SERVE YOU. Culture matters. Since 1971, our Company culture has revolved around the craftsmanship and commitment we learned as restorers of old log and timber frame structures. This culture distinguishes our Company.

WE AT HEARTHSTONE ARE DEDICATED to making available to the public what we believe in:

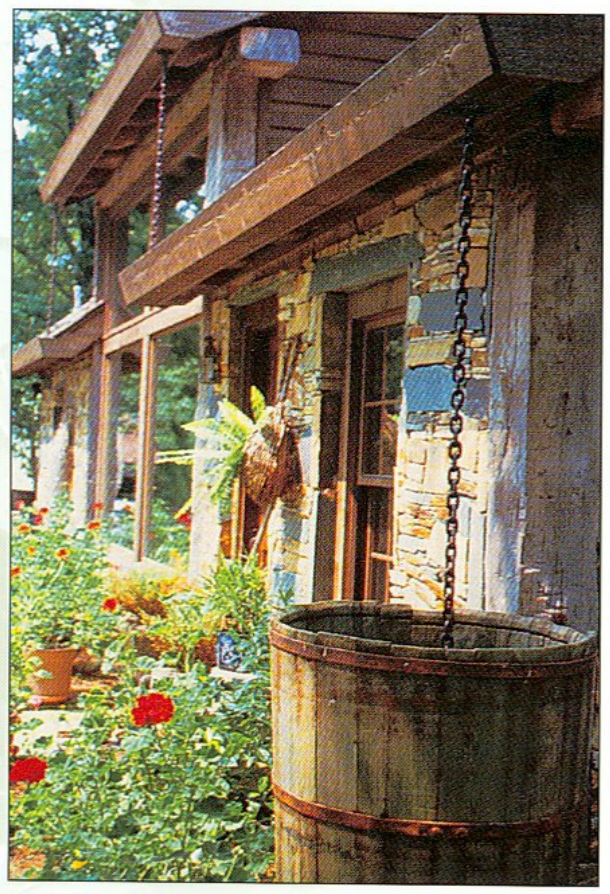

Hearthstone has been creating extraordinary heavy timber homes since 1971. We began as restorers of 150-200 year old structures, and that heritage still drives us today.

Over the many years and thousands of homes, we have always focused on the art and trade of the Timberwright. Our company history, heritage, and culture make us different from others in this business. We have enough size to focus the appropriate resources on your project, yet we maintain that culture of commitment to the creativity and aesthetics of our Timberwright forefathers.

traditional, custom, American products of uncommon character. Products rich with a magical aura and a quiet dignity that makes eyes widen, imaginations spin, and people realize that pride, respect, and craftsmanship still exist in the American marketplace. ❖

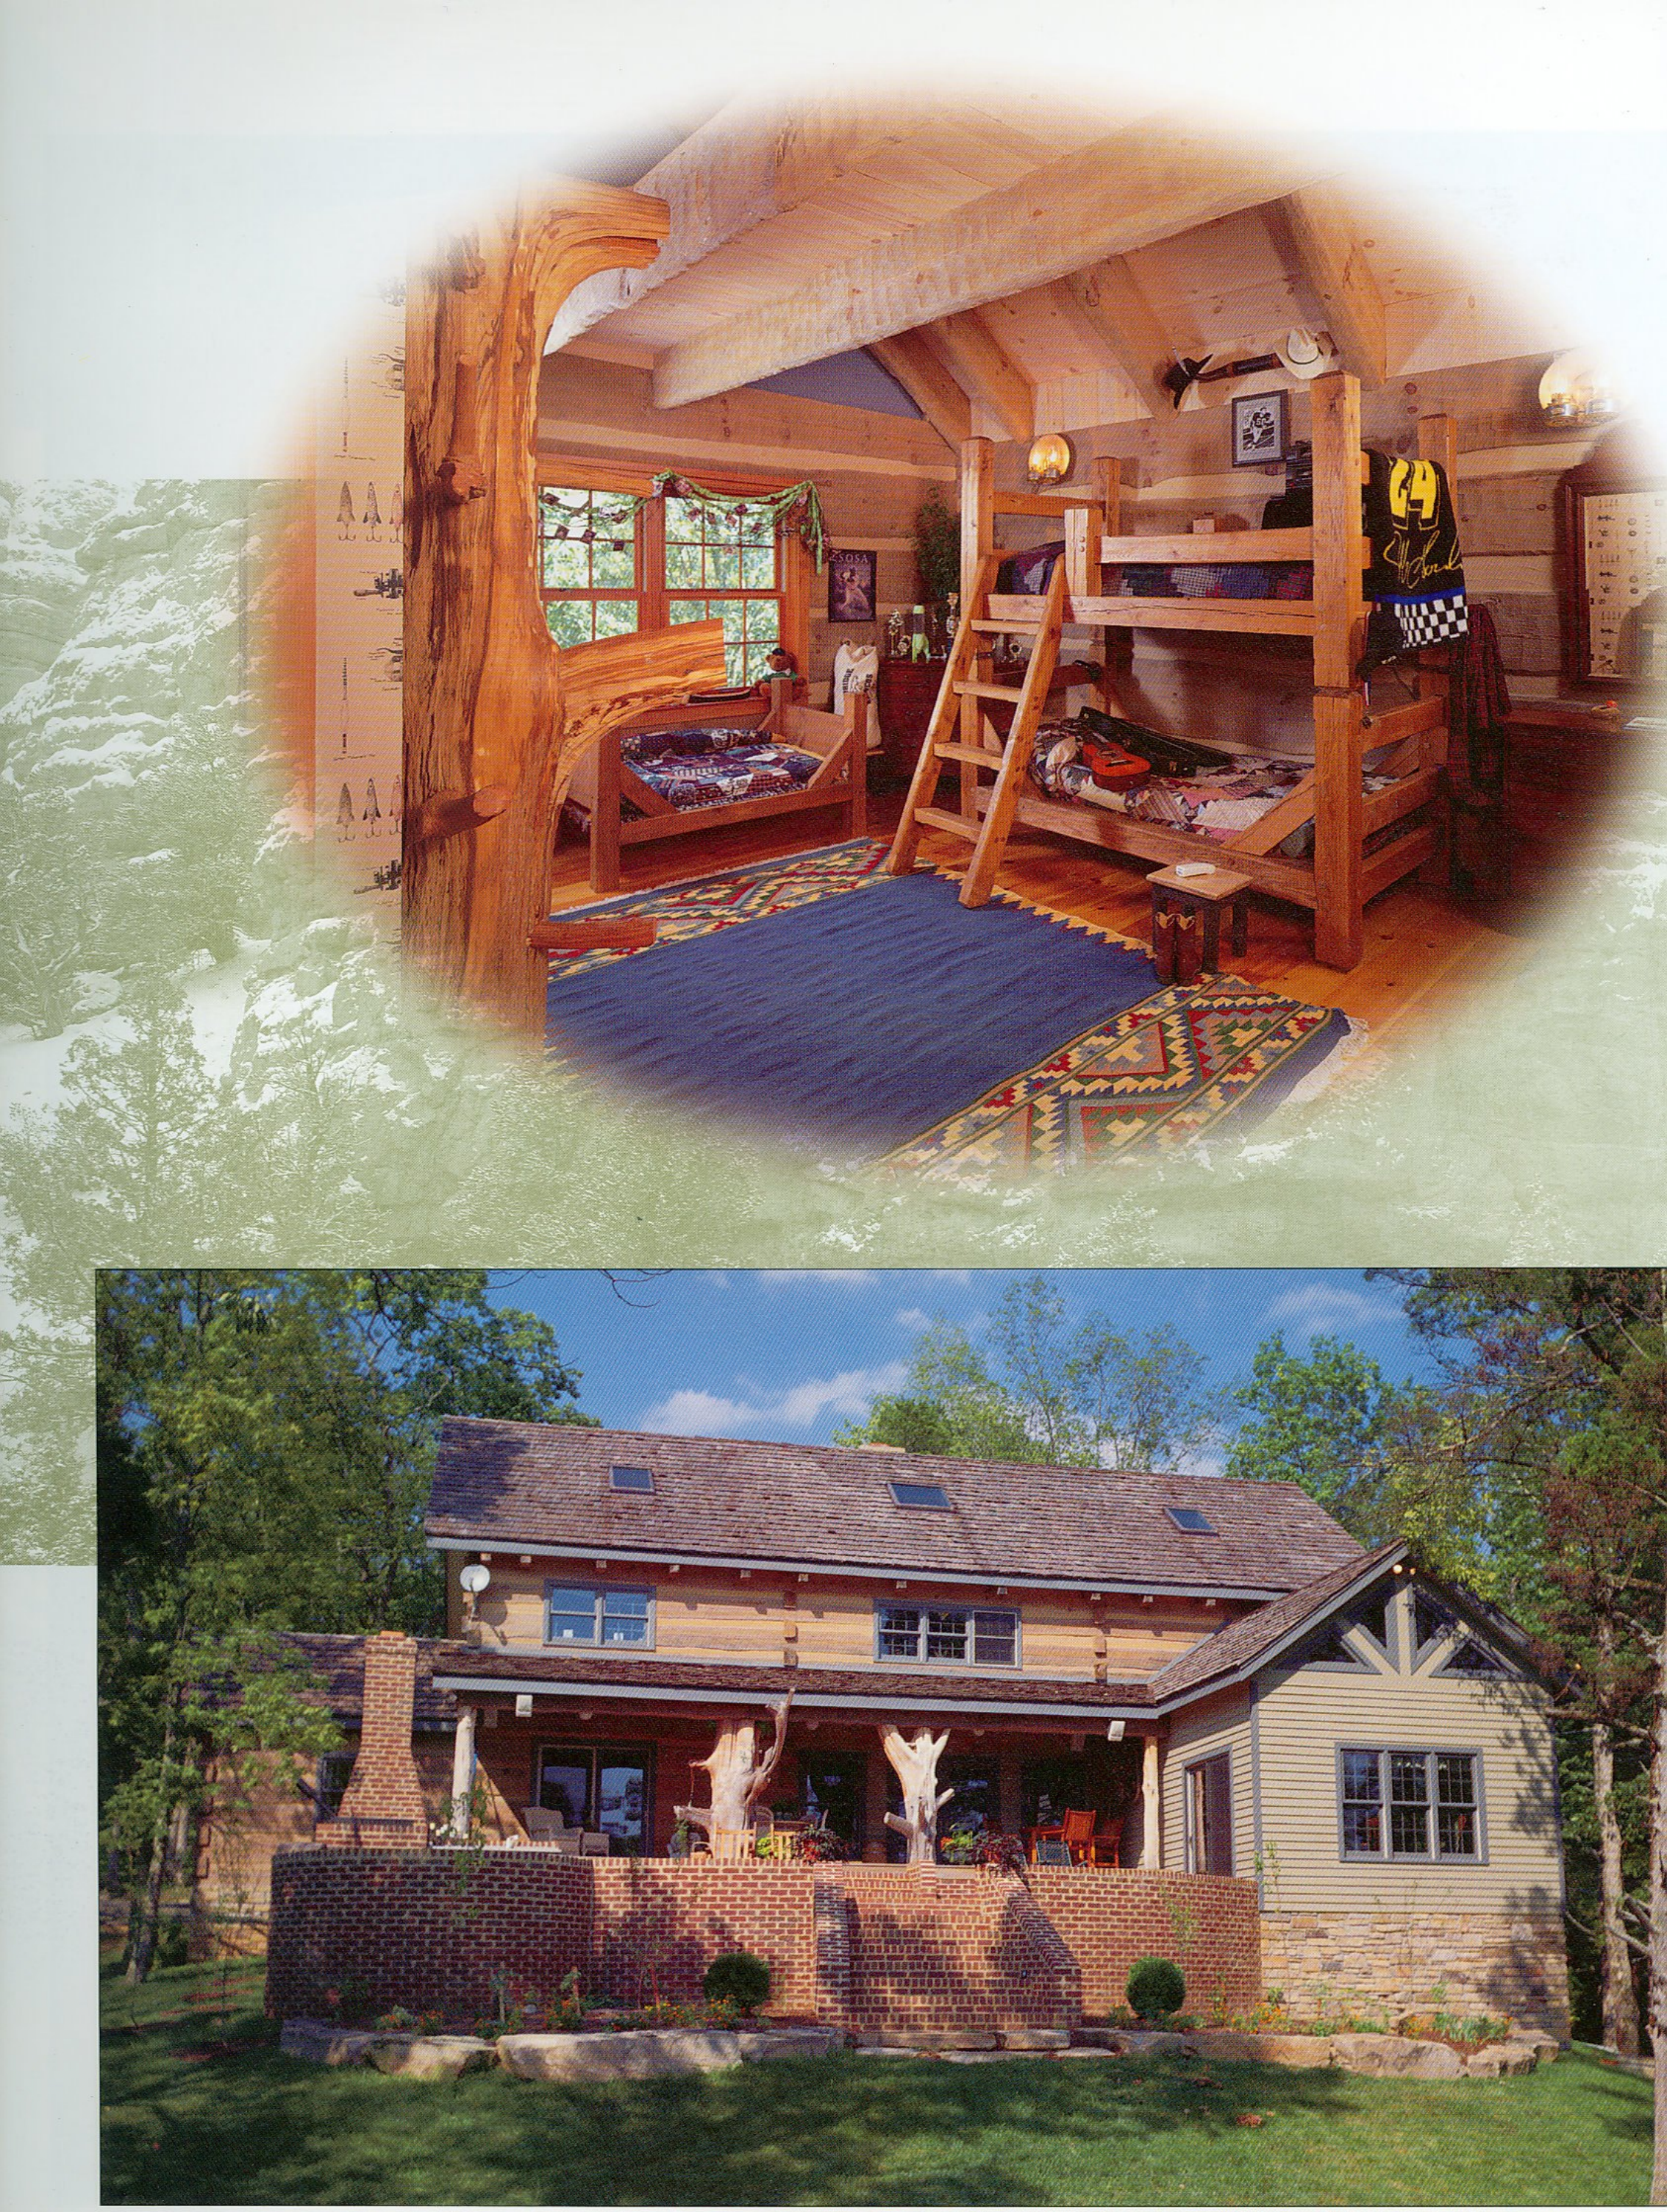

Our History

Hearthstone began thousands of homes ago in 1971 as a restorer of old log homes in the southern Appalachian mountains. It wasn't long until there were more people who wanted those homes than there were old logs for restoration. So, we set about learning how to craft new homes – yet with the quiet strength of character of those original log and heavy timber homes.

Though thoroughly designed and engineered to reflect our experience of thousands of homes and the best in modern technology and comfort, our log homes remain what they were at our modest, yet proud, beginning: faithful reproductions of those 150-200 year old, heart-stopping, hewn, and dovetailed homes that were the pride and labor of our forefathers.

Early in the 1980's, our culture of handcrafting, heavy timber construction, and historical reproduction led us to develop our timber frame homes. *Now most of our homes have elements of both log and timber frame construction.* ❖

SOSA

A REALLY WELL DONE LOG HOME IS INSPIRING. YOU CAN SIT AND ABSORB ONE, AND FEEL A SPECIAL KINSHIP WITH OUR FOREFATHERS IN AMERICAN HISTORY. WHAT A POWERFUL DETERMINATION AND RECKLESS SPIRIT IT TOOK TO CREATE AND PRESERVE OUR UNIQUE AMERICAN CULTURE. AND THERE ARE FEW ICONS OF THAT CULTURE MORE COMPELLING THAN A HEARTHSTONE LOG HOME.

Dear Thistle Lo

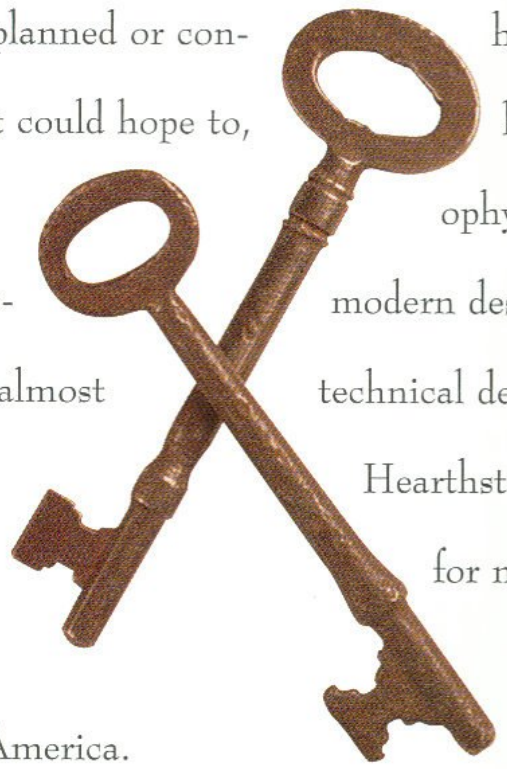

Hearthstone Log Homes

You can still find them: They sit atop the ridges, in the hollows, and on the stream banks of our nation. Like no planned or contrived monument could hope to, these 150-200 year old log structures salute that almost undefinable and unique spirit that was, is, and always will be – America.

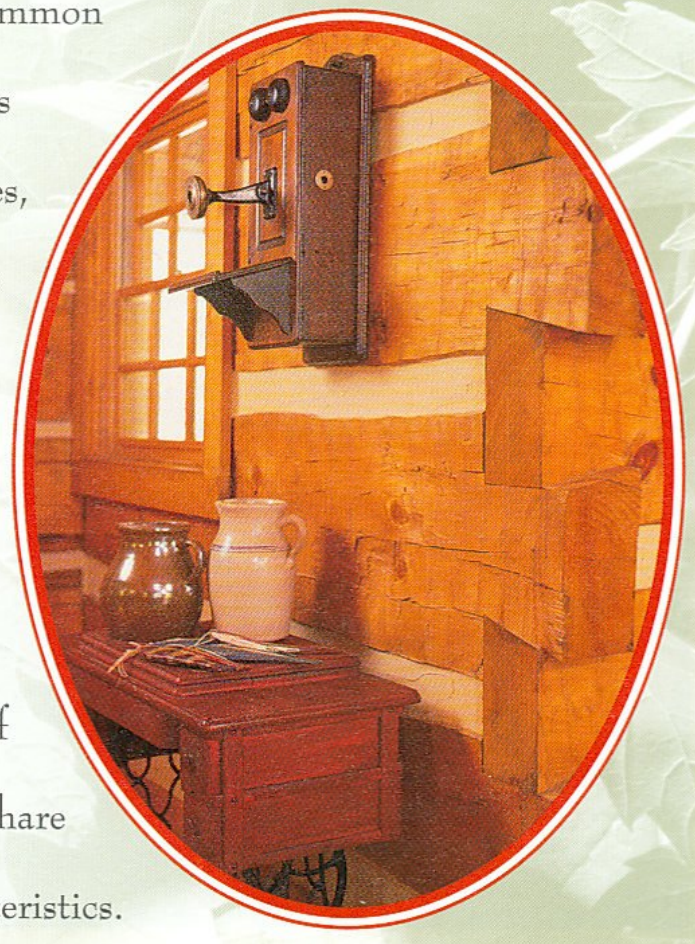

A log home reflects the definitive American soul: the sweat, blood, self-reliance, ingenuity, pride, and unbreakable commitment to doing what must be done. There is a huge reservoir of strong people who believe in America's pride, values, and future. We, at Hearthstone, build that same spirit, tradition, and pride into every home we create.

To most successfully achieve those objectives, we believe that our log homes should authentically reproduce the look, charm, and aesthetics of our forefather's homes. We then combine that basic philosophy with the finest in modern design, engineering, and technical details so that your Hearthstone home is enjoyed for many generations.

Log homes were built all over the United States. Nearly all of the permanent, long-lasting log homes shared the common characteristics of logs hewn flat on the sides, joined at the corners with a dovetail-type notch, and chinked between the logs. While we have several different types of log homes, they all share these general characteristics.

In the 1700's and 1800's, log homes were constructed throughout the country. The vast majority of them were built of logs hewn flat on the sides, with chinking between, and joined at the corners with some variation of a dovetail-type notch. This basic technique was employed for technological reasons, still important and highly relevant today. This - and because we believe the hand-hewn, dovetail look is the most passionately appealing - is the reason it is the basic style of a Hearthstone log home.

The pioneers built their homes this way because of the outstanding technical advantages. We believe in those technical advantages – as well as the tremendous aesthetic appeal.

At Hearthstone, we can respond to many different design ideas from our clients. To get started, we begin with several standard building systems – which we then mix, match, and modify to suit our client's taste and budgets. Some of the styles that are chosen the most:

The Hearthstone *Traditional*

This cost effective system generally features 6"x12" logs up to 40 feet in length. We can alter the hewing look, the chinking gap, the dovetail corner type, edge chamfering, log thickness, and other details to get different looks for different tastes and budgets.

The Hearthstone *Timberwright*

This system features 14" tall logs in various widths (usually 6" or 8") with a very heavy, irregular edge chamfer that mimics the irregular shaped logs of the old log homes or the Hearthstone *Bob Timberlake*™ homes. Once again, we can alter the hewing look, the chinking gap, the dovetail corner type, the edge chamfering, log thickness, and other details to achieve different visual effects.

The Hearthstone *Timberlake*

These homes are truly stunning masterpieces of permanent folk architecture. They have been developed in partnership with world-famous artist and designer, Bob Timberlake. They feature extensive timber framing and massive logs (14"-24" in height). The logs are naturally contoured on the top and bottom (at the chink joint), but hewn flat on the sides – as they were 200 years ago. They are a *better-than-the-original* reproduction of the look and feel of those 200 year old homes.

All of our homes feature extensive technical specifications and techniques that promote centuries of use; please call and we'll dis-

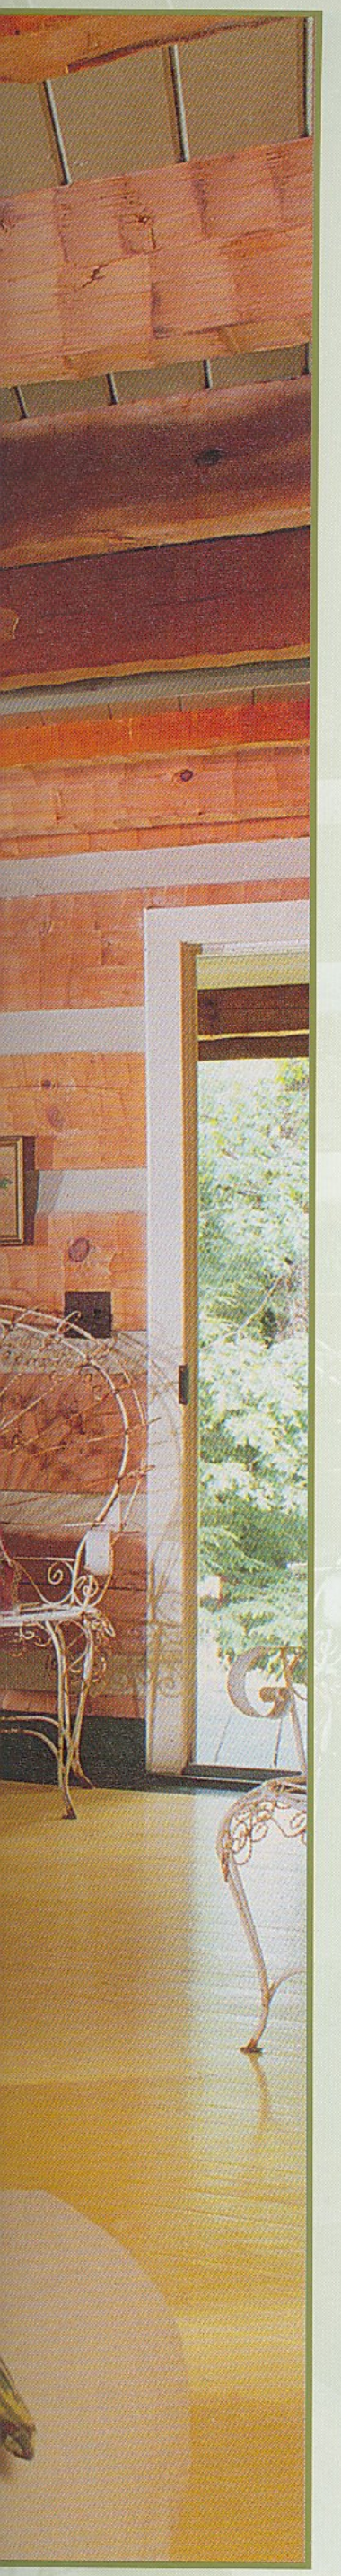

cuss technology in detail. We have many years and thousands of homes worth of experience. We have led our industry in technical innovation and excellence for decades. The systems, engineering, and details we build into each home – through the best of both hand-crafting and CAD-CAM technology – are the key to the success of your project.

If you love timber, but find the log homes a bit too rustic – keep reading. We have the home for you in our timber frame system. ❖

timberlake

We feel that a business should deliver wisdom, competence, and integrity to its clients. The successful creation and construction of these extraordinary homes must begin and end with this concept.

Timber Frame Homes

THOSE HEAD-SHAKING, JAW DROPPING SKILLS OF THE TIMBERWRIGHT ARE SHOWCASED IN THE BUILDING TRADE AS BOTH LOG AND TIMBER FRAME STRUCTURES. A TIMBER FRAME FEATURES EXACTING MORTISE-AND-TENON JOINERY, A LESS-RUSTIC LOOK, TREMENDOUS ENERGY EFFICIENCY, AND A WIDE RANGE OF ARCHITECTURAL STYLES. THE EXTERIOR FINISH CAN BE OF ANY STYLE INCLUDING WOOD, BRICK, OR STONE. THE INTERIOR FEATURES EXPOSED, FINISHED TIMBERS AS WELL AS CONVENTIONALLY PAINTED, PAPERED, OR PANELED WALL FINISHES.

Timber framing is a majestic type of construction that utilizes exacting mortise-and-tenon joinery and massive timbers to form the framework of a building. The beautiful frame is then left exposed on the interior of the home – creating a breathtaking effect of open spaces and craftsmanship rarely seen in this century.

The exterior of the frame is covered with a highly energy-efficient blanket of foam core panels. *The result is a home of unmatched beauty, value, energy efficiency, and design flexibility.* Generally, the look is less rustic than a log home, yet the core skills and a reverence for wood are the same.

Timber framing was meticulously practiced for centuries as the preferred method of building construction in many parts of the world. Living examples of long-lasting timber frame structures include Japanese temples, European cathedrals, bridges, boats, and early American homes and barns.

Late in the 19th century, the introduction of structural steel, dimension lumber, and wire nails nearly eliminated the art and trade of the Timberwright. Thankfully – as people re-discover the value of permanence and roots, there is once again an eager market for the timber frame home and commercial structure.

The timber frame system is particularly flexible when it comes to design. We use it constantly in every application from modern contemporary to modern rustic

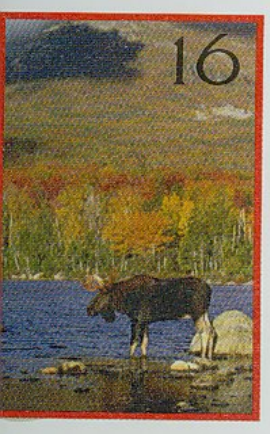

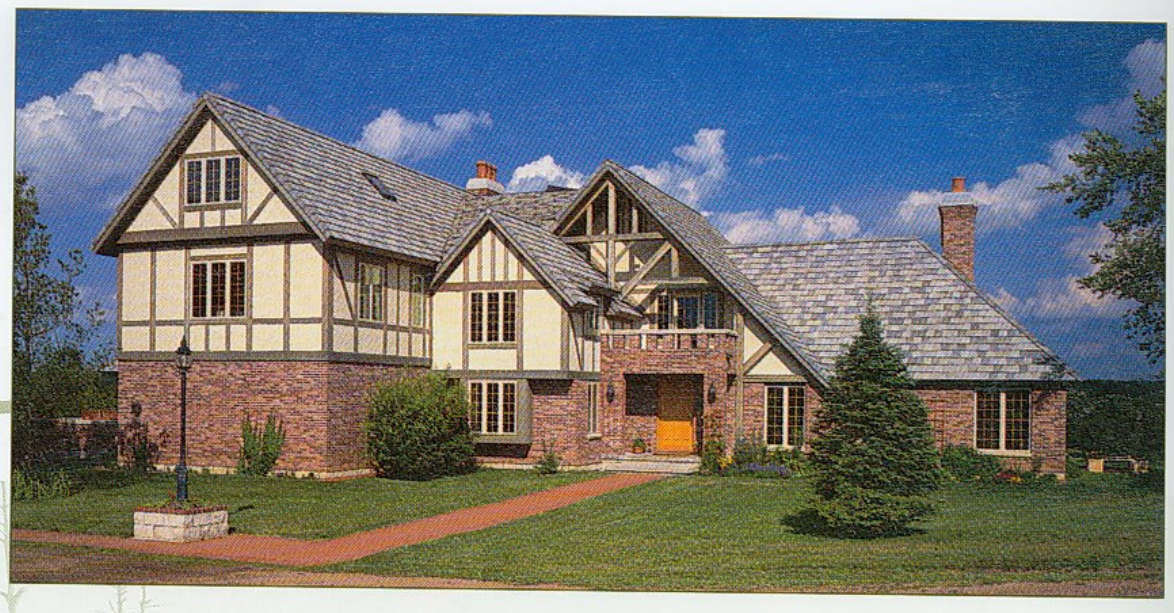

e Frame Home

to period reproduction. We can use any specie of wood, including recycled timber. We can provide a wide variation in surface finishes – from planed and oiled, to hand hewn, to WeatherAged™ – and more. And, the tremendous energy efficiency of the foam core panel technology is an often overlooked bonus.

Increasingly, clients are mixing both log and timber frame techniques in the same house. The results are spectacular. Come to Tennessee to visit and see what we do! ❖

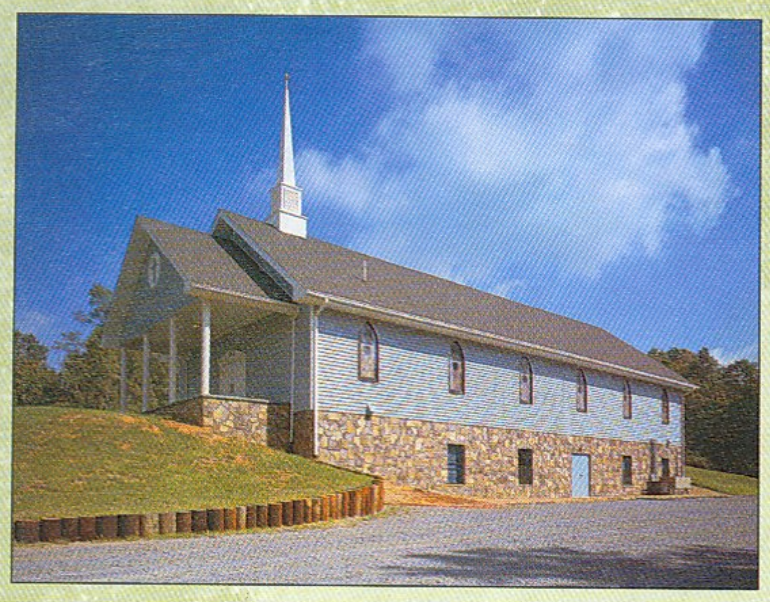

It is sometimes difficult to add to a historical structure or site without destroying the existing charm and atmosphere. A timber frame or authentic reproduction log addition or complementary building often does the trick. With Hearthstone's design and timberwright skills, the additional space will become not an apology, but a creative complement to the existing site.

FEATHER HILL

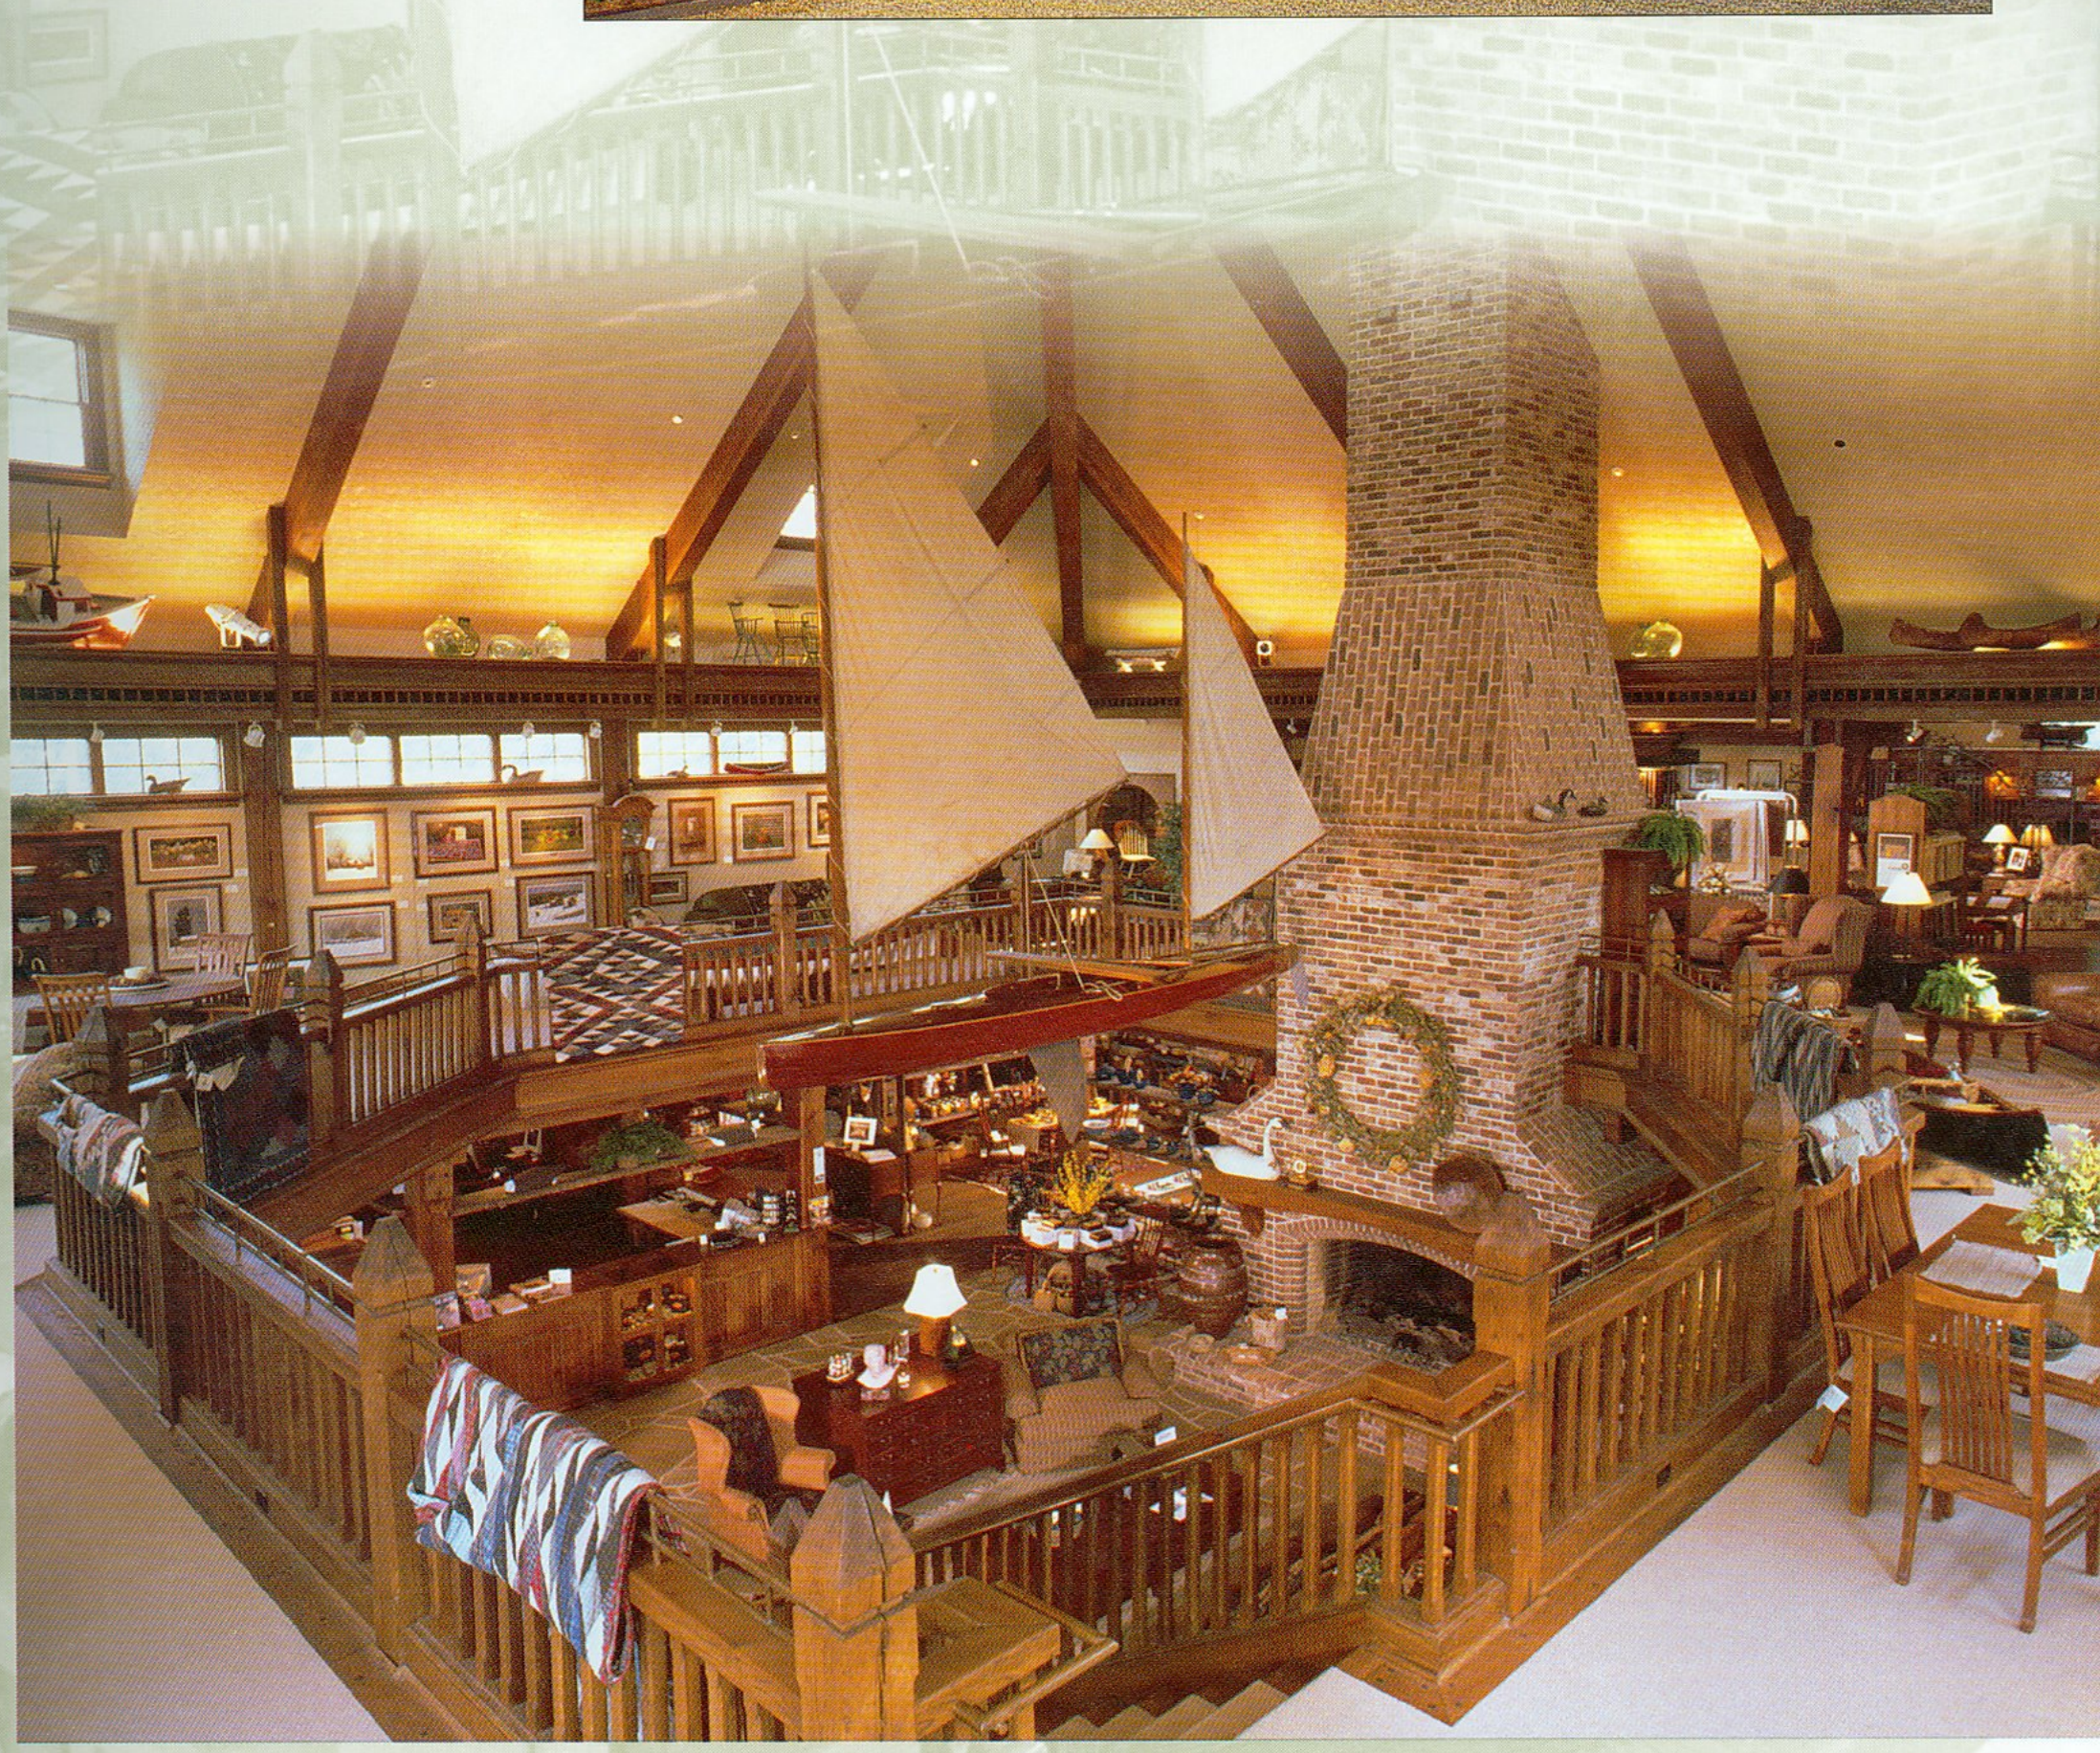

At Hearthstone, the creation of extraordinary spaces extends beyond residential homes. We have created many successful commercial structures throughout the United States and in foreign countries. On these pages, you will see churches, a specialty retail mall, a winery headquarters, and a barn/entertainment complex. We've done many other projects including golf course clubhouses, restaurants, ski lodges, bed & breakfast inns, hunting lodges, furniture showrooms, and more. If your commercial project can benefit from a really stunning environment, we have the experience to help you make it happen.

When world famous artist and designer Bob Timberlake needed a log home partner to complement his *Bob Timberlake™* Furniture Collection, he searched the entire industry and chose Hearthstone. Visit his stunning furniture and art gallery - shown here in Lexington, North Carolina.

How To Proceed

First, Spend Some Time With The Photography. Get a feel for whether you lean towards log or timber frame – or a mix? Think about a visit to Tennessee to see our operations and some homes. Once you get an idea about building systems and general aesthetic preferences, start preliminary work on your design.

Your First Step Is Design. Use the design section to get started, then call us for a design interview. All situations are different, but a very rough rule of thumb is to start designing a custom home about a year in advance of the start of construction. Of course, we can move much more quickly than that (particularly with a standard plan) – and some projects take even more than a year of planning and design work. We can start specific design work on your project for a very modest fee.

Early and Extensive Design and Planning Will Dramatically Improve The Entire Process. Call us and our project managers will help guide you through the process.

Once design is finished and a Purchase Agreement is signed, final planning for your home is completed. Your home will be crafted in Dandridge, transported to your site, and erected by one of our trained crews – or by your crew with our on-site technical assistance. After the heavy timbers and panels are erected (on the foundation that your builder has already installed), your builder takes over and finishes your home. Along the way, we have on-site technical assistance available as an option. We also encourage you and your builder to visit us for pre-construction meetings.

Call us for more discussion about the process. ❖

There are several ideas in the Design Section to help you get started.

Find the home that is most appealing to you from a "look & feel" perspective. Don't get too hung up on the particular floor plan that is presented; try to find the home that most appeals to you visually.

There will be a featured floor plan for that home, but you need to know that we have several floor plans – of different sizes and layouts – for that basic "look" or "family" of homes. Call us and we'll find the one that closest fits your needs, wants, and budget. Then, we'll go from there to do final customization for your exact needs.

Don't worry if what you are looking for doesn't seem to be there. Almost all of our work is custom. What is in this guide is only a small selection of what we have done. Call us. If it can be done, we can do it.

Remember... Spectacular homes are not the only things we create. We have a wealth of experience in commercial structures as well as additions to existing structures.

While we specialize in extraordinary heavy timber construction, our architectural results span many different preferences and styles. We believe that any person who wants a home of imagination, distinction, character, and technical excellence is best served at Hearthstone.

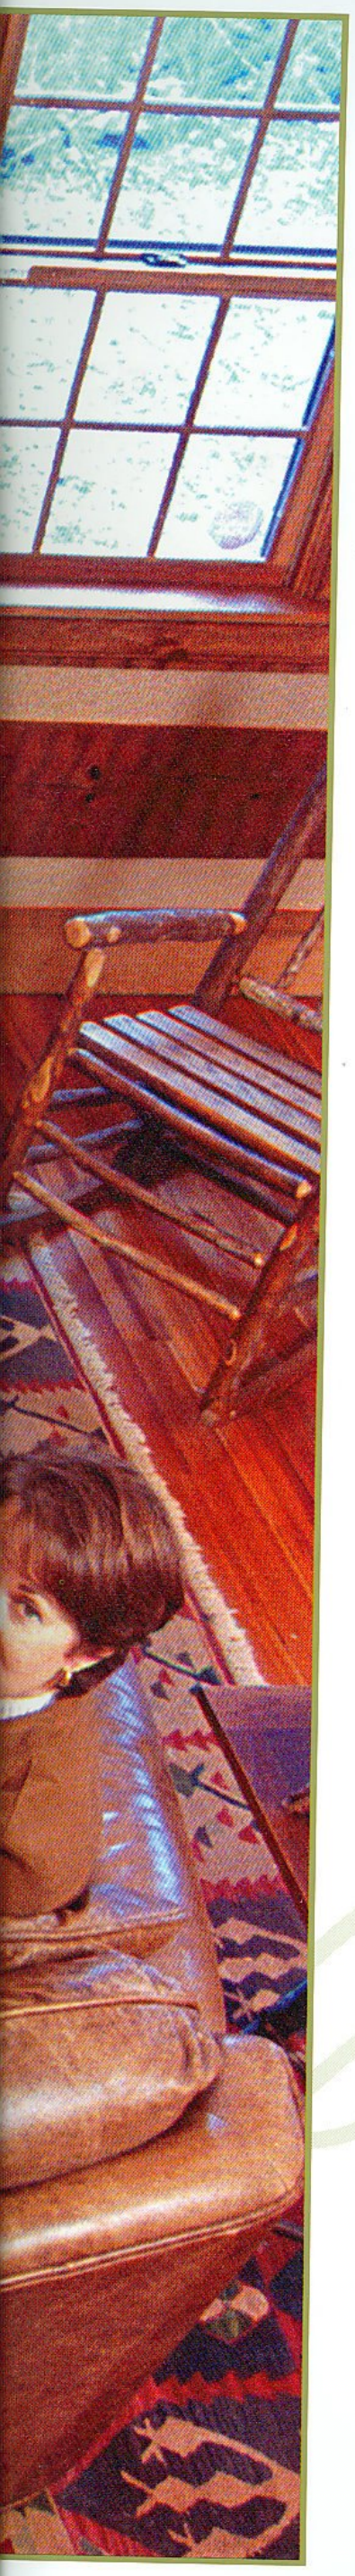

Homes like these don't simply "happen". We've done it more than 3000 times since 1971. That collective experience, competence, and reputation – more than any other single factor – is what you get from Hearthstone.

Conclusion

Ours is a rewarding profession. From simple ink and paper, we create your design.

From simple building materials, we craft and deliver a spectacular home. We would very much enjoy the responsibility for creating your very own, very special, and very extraordinary living environment.

If we are awarded that opportunity, we intend to do our job well... AND –

If in the 22nd century, some proud American reading Frederick W. Branch's FULFILLMENT (page 2) reacts with a lump in his throat, mist in his eyes, and a knowing smile...

And if that proud American is one of your descendants...

And if that house was carefully crafted by Hearthstone Timberwrights in Dandridge, Tennessee in the dawn of the 21st century...

THEN – we will know that we have indeed done our job well. ❖

MANY YEARS AGO, WE AT HEARTHSTONE VOWED TO PUT INTO WRITING AN EXTRAORDINARY PROMISE – TO UNDERSCORE OUR COMMITMENT TO DELIVERING ON OUR RESPONSIBILITIES. THAT MONEY-BACK GUARANTEE HAS NEVER BEEN EQUALED IN THE HOUSING INDUSTRY. AND WE'RE PRETTY PROUD OF THAT. CALL A HEARTHSTONE REPRESENTATIVE FOR THE DETAILS.

WE GUARANTEE THE STRUCTURAL INTEGRITY OF OUR HOMES. OUR TIMBERS ARE INDIVIDUALLY STRESS-GRADED TO THE STANDARDS OF AN INDEPENDENT AGENCY AND OUR BUILDING SYSTEMS ARE IN STRUCTURAL COMPLIANCE WITH A MAJOR CODE AGENCY GUIDELINE. IF YOU PURCHASE A HOME FROM US AND TAKE DELIVERY AND ERECTION AS AGREED, AND YOU ARE THEN DISSATISFIED WITH THE QUALITY OF OUR PRODUCT, WE WILL DISMANTLE THE STRUCTURE WE ORIGINALLY ERECTED, AND REFUND THE MONEY YOU GAVE US. FOR COMPLETE GUARANTEE DETAILS, PLEASE CONTACT A HEARTHSTONE REPRESENTATIVE.

The heft and feel of a well-worn handle,
The sight of shavings that curl from a blade;
The logs in the woodpile,

the sentiment of huge beams in an old-fashioned house;
The smell of fresh-cut timber and the fragrance of burning leaves;
The crackle of kindling and the hiss of burning logs.
Abundant to all the needs of man, how poor the world would be
Without wood.

~Everard Hinrichs

Thank you very much for considering Hearthstone.
