AMERICANA

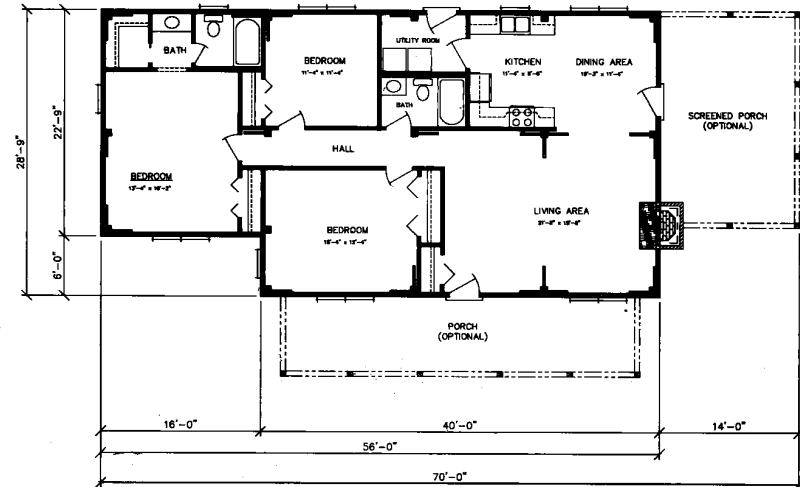

Owning a home of your own. It's part of the American Dream. But sometimes seems an elusive part at best—especially if you're just beginning a life of your own. With that in

mind, Hearthstone presents the Americana. A beautiful example of single-story simplicity, this TimberFrame is designed with a conventional truss roof system to promote economy without

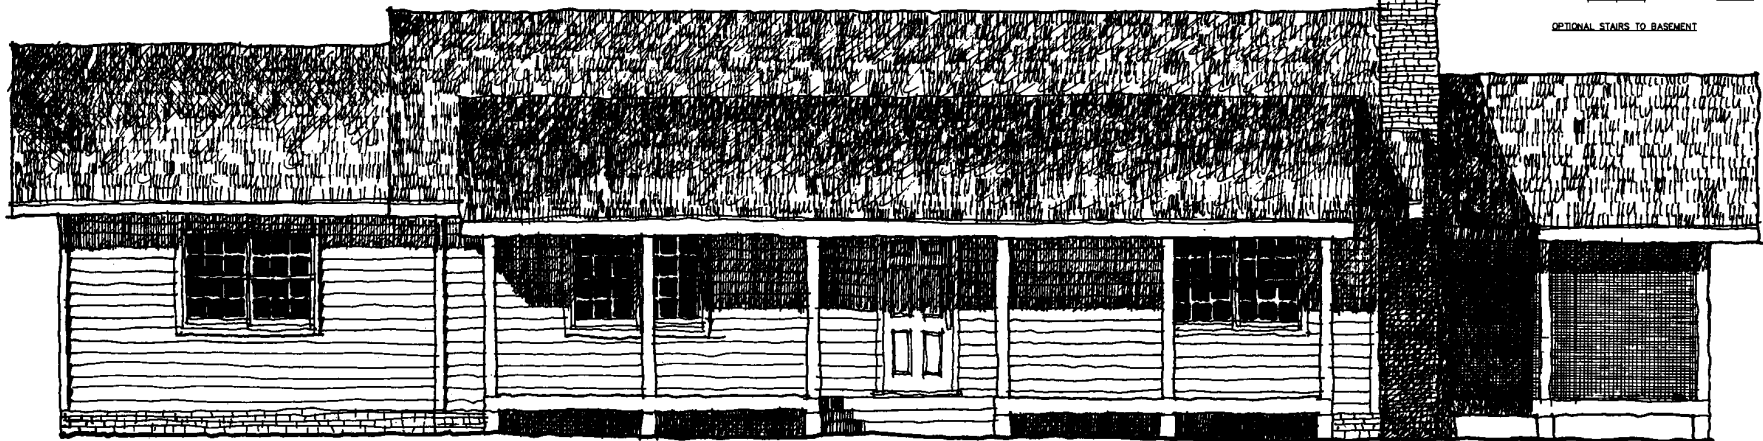

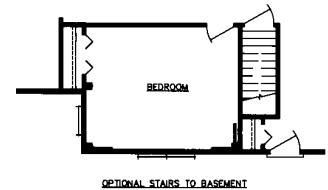

sacrificing quality. With a look and feeling that so well represents America, its people and its history, the Americana will undoubtedly make reality of the dreams of many.

Scheme C	2676	318

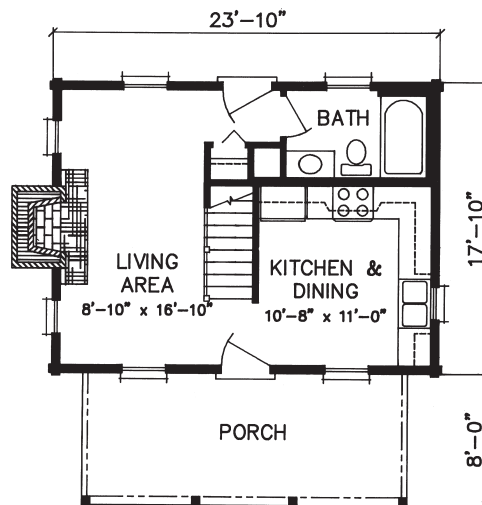

SCHEME A

Three cabins have been arranged to form an "H" shape plan. The central cabin is a connector accommodating foyer and kitchen. The wing extending to the left of the connector is a two story space for those private areas - bedrooms / study / bathrooms. Formal dining and living rooms occupy the wing to the right and are separated by a 7'0" high wall.

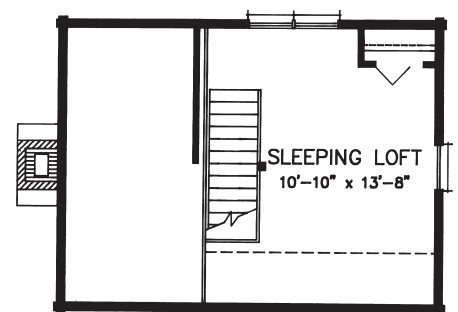

ASPEN

The perfect vacation retreat cottage. The Aspen also makes an excellent starter home for young couples because you can add to it in future years to meet your expanding family needs.

FIRST FLOOR

SECOND FLOOR

IPSWICH

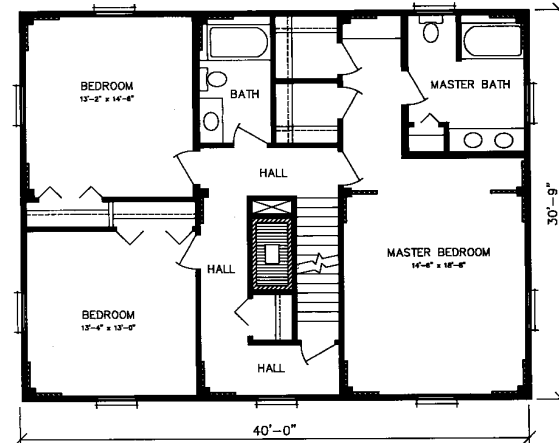

In the middle of the seventeenth century despondent Britons fled to this country in search of religious freedom and settled in the Massachusetts town of Ipswich. They brought

with them their own rich tradition of timber framing. Interestingly, the special beauty of their homes was the result of circumstance. Overhangs allowed larger second stories to be built over ground floors that, in England, had

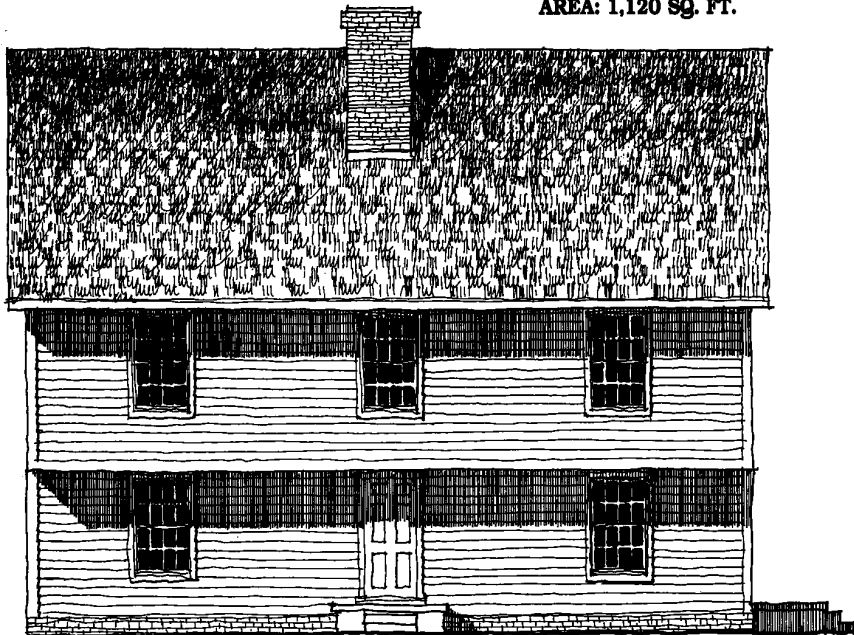

been limited by small lots. Decorated drops helped rainwater run off the siding. Out of necessity and practicality grew the unique style we proudly present to you in the Ipswich.

PATTERSON

When the English came to this country in the 1600's, many customs came with them. In England, for instance, small lots had forced people to build homes with second floors that

were larger than the first in order to increase living area. Once in America, the Colonists continued to build homes in this fashion. In the Patterson, we've re-created that structure and

blended it with an open, contemporary design. The result—more living area for you, including a great room that's perfect for relaxing, entertaining and just plain living.

FIRST FLOOR

SECOND FLOOR

SCHEME A

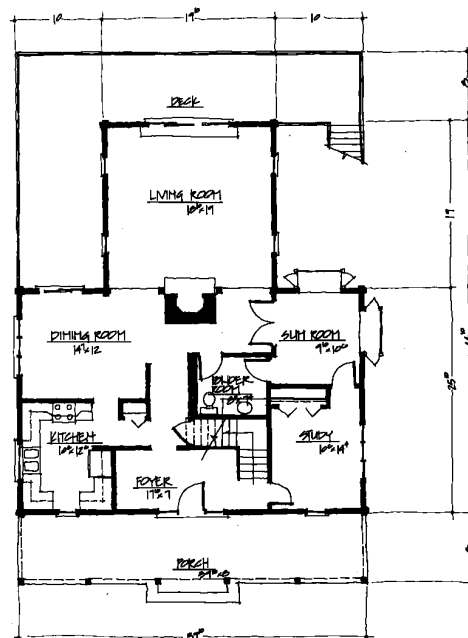

The main body of the home is a basic rectangle with the wing extension serving as the primary living space. Central to the house is the plumbing for 2½ baths. The wing is a sunken great room with a cathedral ceiling. Overhead, two private balconies help preserve the openness of the great room while providing more area and charm to the two upper bedrooms.

SCHEME B

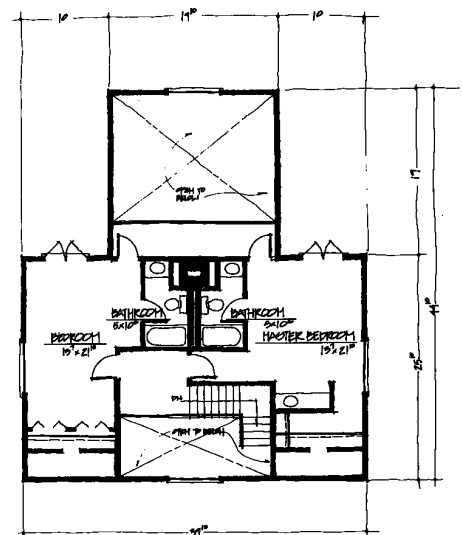

Like in Scheme A, this plan offers openness in the great room and ample dining, kitchen, sunroom & study areas. A larger balcony overlooks the great room and connects the 2 bedrooms. Opened to overhead, the foyer is even more overwhelming than in schemes A, and more efficient by serving stairs to above.

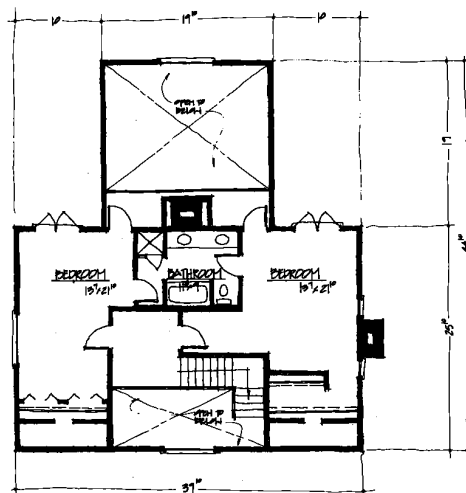

FIRST FLOOR

FIRST FLOOR

SECOND FLOOR

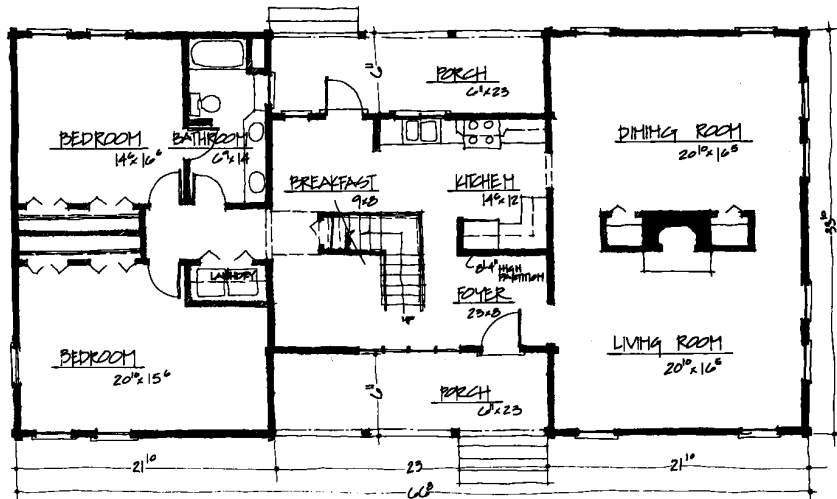

SECOND FLOOR

SCHEME C

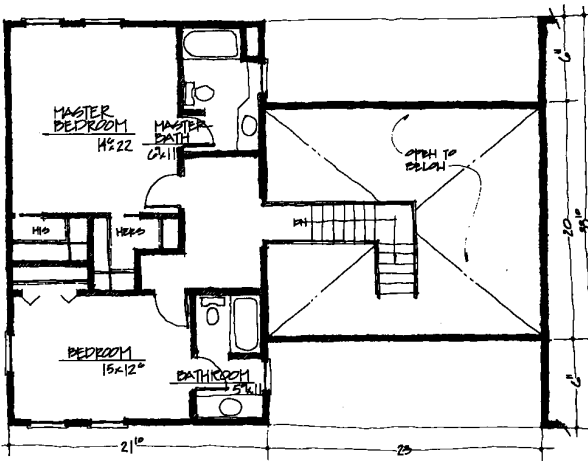

This scheme offers 3 bedrooms. The master suite accommodates plentiful closet space, a master bath and a fireplace. The 2 bedrooms above share a very spacious bathroom and overlook the sunken great room.

SCHEME B

By centrally locating the stairs, we have been able to accommodate an extra sitting area next to the foyer. A more informal breakfast area has also been provided next to the kitchen. On this scheme, like the others, partitions are only 7'0" high allowing for more light and openness. The left cabin houses 4 very ample bedrooms and 3 full baths. Dining and living areas are separated by a stone face fireplace and closets for extra storage. Porches extend both front and back.

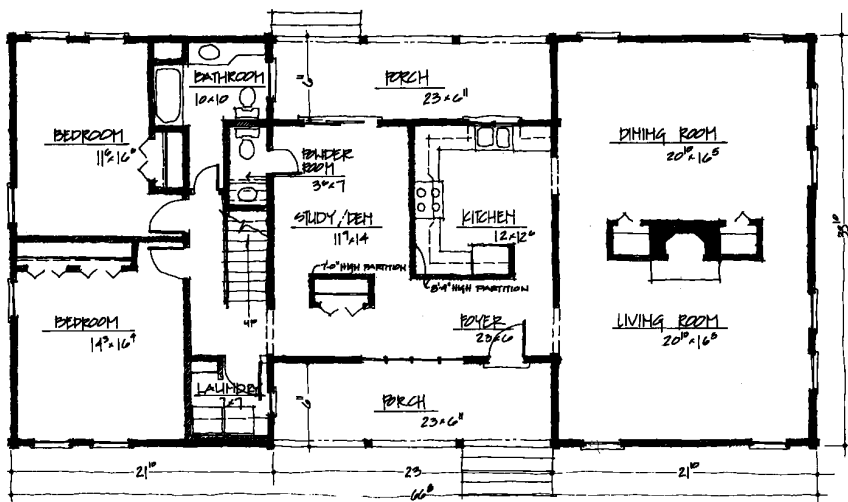

FIRST FLOOR

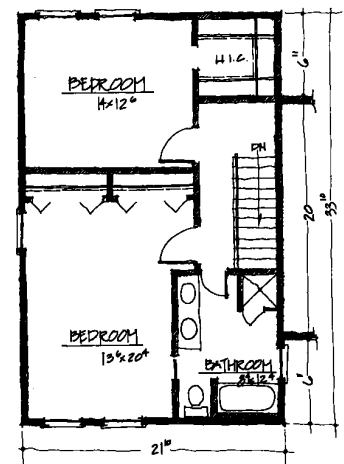

SECOND FLOOR

SCHEME C

This scheme more efficiently accommodates 4 ample bedrooms with 2½ baths, and a laundry room. A separate study / den has been added to the central space separated only by a closet that is 7'0" high. Again very formal living and dining areas are separated by a stone face fireplace and extra storage.

SHADWELL

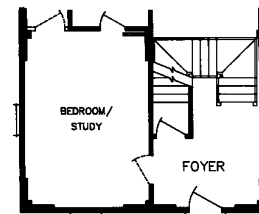

Thomas Jefferson, perhaps more than any other person, shaped the future of America. A renowned statesman and philosopher, this third U.S. President was also talented architect who, at age thirty, put down on paper the plans of his birthplace. Shadwell, a simple clapboard house, was typical of the homes that dotted the Piedmont area of the Virginia wilderness. It is after Jefferson's first home that we pattern this timeless TimberFrame, a simply beautiful dwelling for people seeking great things from life. Why not start shaping your future now... with Hearthstone's Shadwell.

SHENANDOAH

Typical of many homes which have survived since pioneer times, this style was the ultimate in log home design and craftsmanship. Except for technological innovation, little has been changed to recreate the rugged, sturdy and robust appearance of its exterior. The beauty of hewn wood interiors adds charm to the harmony of its design for total log home living.

SIMPSON

A pleasing and delightful appearance is achieved by a balcony overlooking the living room with its ascending cathedral roof structure and native stone chimney extending all the way to the rafters. The compact design makes advantageous use of all the floor space. Front and back porches accent the exterior appearance.

SPRINGFIELD

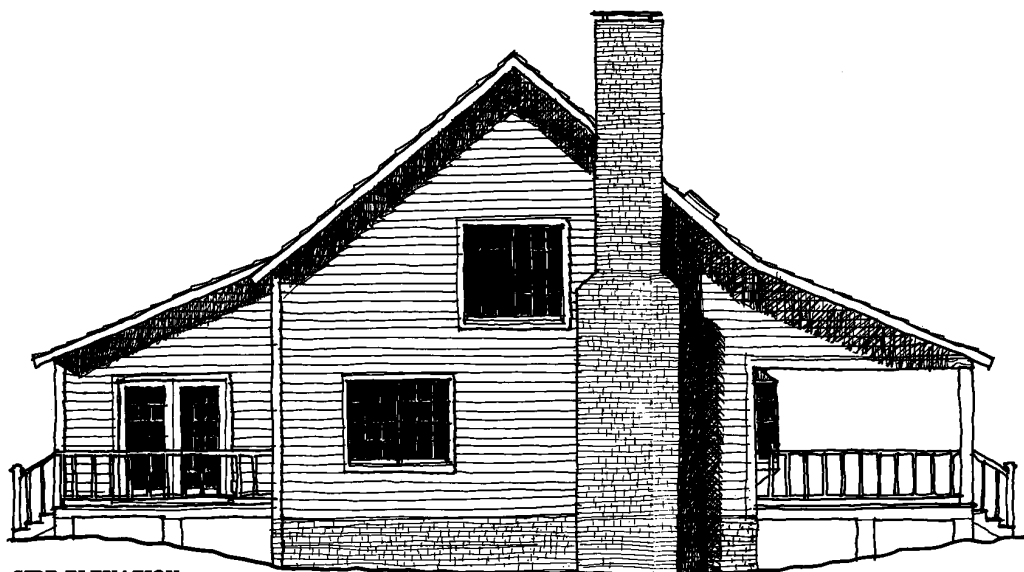

This model is a good example of beauty of outside proportions and roof angles. A wood shingle roof flares at the ends and extends over

a projecting front porch. Bay windows and a protruding study / den add to this dynamic look of this colonial style home. Like in colonial

times, materials such as our solid oak timbers are beautifully crafted and used in a fairly simple state.

TENNESSEAN

FRONT ELEVATION

Look beyond the brilliant beauty of the Tennessee Highlands and you'll find a history filled with people who wanted from life much more than the ordinary. Sam Houston. Davy Crockett. Andrew Johnson. The Tennessean was created in that same spirit, with a disdain for the mundane that makes it as much a work of art as a piece of architecture. A home of intricate, hewn detail and extremely livable design, it's ideal for people who refuse to settle for the ordinary.

VIRGINIAN

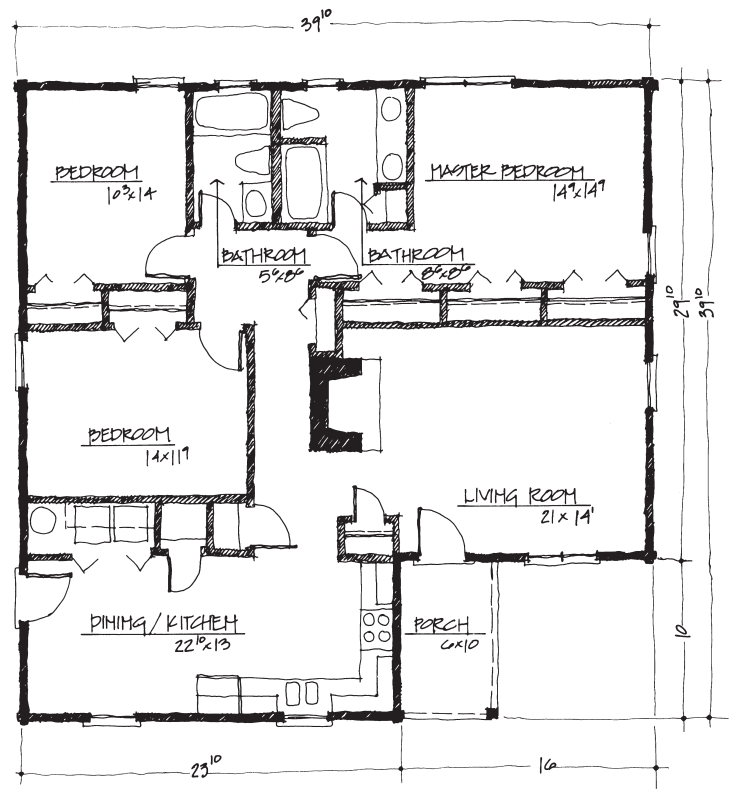

FRONT ELEVATION

The Blue Ridge area of Virginia, with its breath-taking vistas and unspoiled forests, is one of the state's main attractions. That same natural beauty is what calls you home to this model. Its top-quality timber, much like its surroundings—unspoiled, enduring. The Virginian. Just as beautiful to live in as it is to look at.

WALLACE

The meticulous craftsmanship and solid structuring of long ago. The openness and clean lines of contemporary design. All come together impressively in the Wallace—an exquisite combination of the traditional and the contemporary. This model, like all other Hearthstone TimberFrames, offers unrivaled beauty and quality. In considering a home for your future, consider investing in these finest features of both the past and present.

WESTWOOD

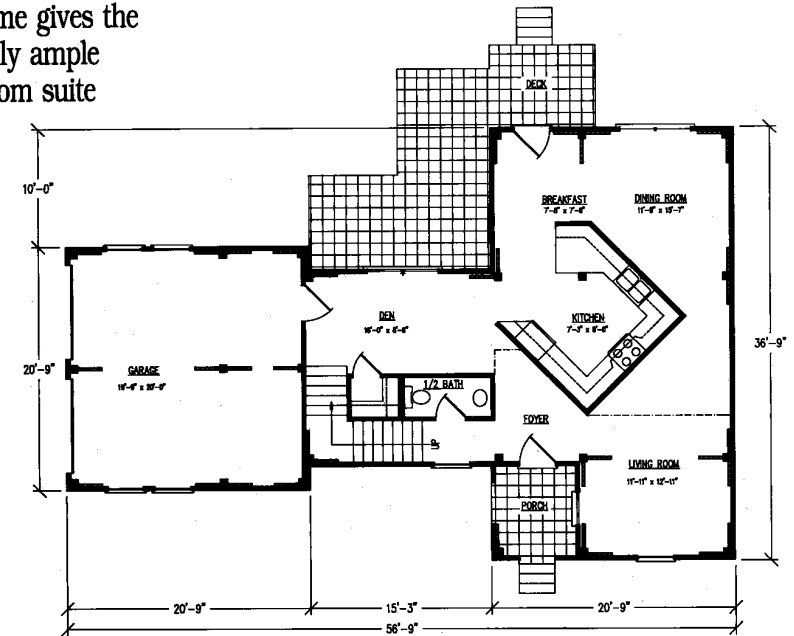

By treating the kitchen as a floating space conveniently located at the center of the house, we have created living spaces screened from each other with a minimum amount of walls. The arrangement of this home gives the most important spaces appropriately ample volumes. The sunny master bedroom suite occupies a 20' x 20' area above the garage and is open all the way to the peak. The solid oak Timberframe throughout the interior underscores the effort to make the most out of a space.

The Windsor is a house built up of 9 equal bays forming a perfect square. It is a perfect example of simplicity dressed-up by wrap-around porches with changing roof lines, and a sculptural fireplace attached to the main stair serving as the core of the house. A house with ample, carefully layed out rooms that allow for extra square footage at the top for a loft/bedroom that opens onto a curving porch. Large amounts of glass and the polished oak Timber Frame enhance this house furthermore.
