CUSTOM
BARNS

An unmatched ability to create any imaginable style of

CUSTOM, LUXURY, HEAVY TIMBER

or log based barn, home, or commercial structure

3850 square feet
3 Stalls

TIMBER FRAME HOMES

and structures feature heavy timber framework, pegged and joined like it was centuries ago, creating dramatic interior spaces, allowing any imaginable style or finish. The stunning frame is then married to a high-tech, extremely tight and energy efficient blanket of structural insulated panels. The result is a highly personalized home of unmatched beauty, value, energy efficiency, and unlimited creativity. Timber frames are the most flexible building system from the perspective of look and style.

LOG HOMES

reflect the definitive American soul: the sweat, blood, self-reliance, ingenuity, pride, and unbreakable commitment to doing what must be done. Since 1971 we have been building that same spirit, tradition, and pride into every home we create. To most successfully achieve those objectives, we believe that our log homes should authentically reproduce the look, charm, and aesthetics of our forefather's homes. Nearly all of the permanent, long-lasting log homes shared the common characteristics of logs hewn flat on the sides, joined at the corners with a dovetail-type notch, and chinked between the logs. We combine that basic philosophy with the finest in modern design, engineering, and technical details so that your home will be admired for many generations to come.

COMMERCIAL STRUCTURES

of every imaginable style, size, and use. Our creation of extraordinary spaces extends beyond residential homes. We have a long history of designing and building spectacular commercial buildings throughout the United States and in foreign countries. Nothing can create the atmosphere and convey the strength of character of your business like one of our timber frame or log structures.

TIMBER FRAMES

The living environment created by a timber frame provides for harmonious interaction between nature, family, and guests. Timber frames are built with massive timbers and a dizzying array of intricate, hand-pegged, mortise-and-tenon joinery. Creative surface textures include planed smooth with chamfered edges, hand hewn, WeatherAged™, distressed, or any combination desired.

The beautiful timber framework is left exposed to the interior of the barn, creating breathtaking effects of open space and craftsmanship rarely seen in more than a century. Flexibility of design, appearance, and function are key to the popularity of timber frame barns. Any exterior look or architectural style from any period can be designed using wood, brick, stone or stucco. The inside includes stunning timbers of any style or wood specie.

HORSE BARNS

Traditional style barns pay homage to a great American tradition. For those seeking a multi-purpose barn made of traditional materials, these structures are hard to surpass. This beautiful, yet functional, barn was designed to house horses and the occasional social gathering. Because the customer was in the process of restoring a farmstead from early in the 20th Century, the technique and style reflect that period & geography. In keeping with the look and feel of the turn of the century, we developed a process for giving the timbers a surface texture that mimicked the circular cuts of timbers that had just come out of an old sawmill. The naturally weathered cypress board & batten gives the barn the perfect rustic finish. All of our barns are custom and we can do anything you want, so don't feel constrained by our existing projects or floor plans.

BARN HOMES

The traditional design and use of the “barn” have evolved tremendously over the years. One of the most popular innovations is the “barn home” due to it’s open, airy floor plans and massive posts and beams. These homes convey the aesthetics of a traditional barn, combined with a modern, energy efficient design.

GUEST BARNS

The guest barn's efficient design enables a lot of living in a small amount of space. This particular design features a two car garage and golf cart garage. Above the 2-car barn garage is a guest suite loft with morning kitchen and bath.

EVENT BARNS

Cathedral ceilings and stunning light fixtures create the perfect backdrop for almost any type of event. From parties, banquets, and fundraisers, timber frame barns can accommodate any style of gathering.

COTTAGE BARN

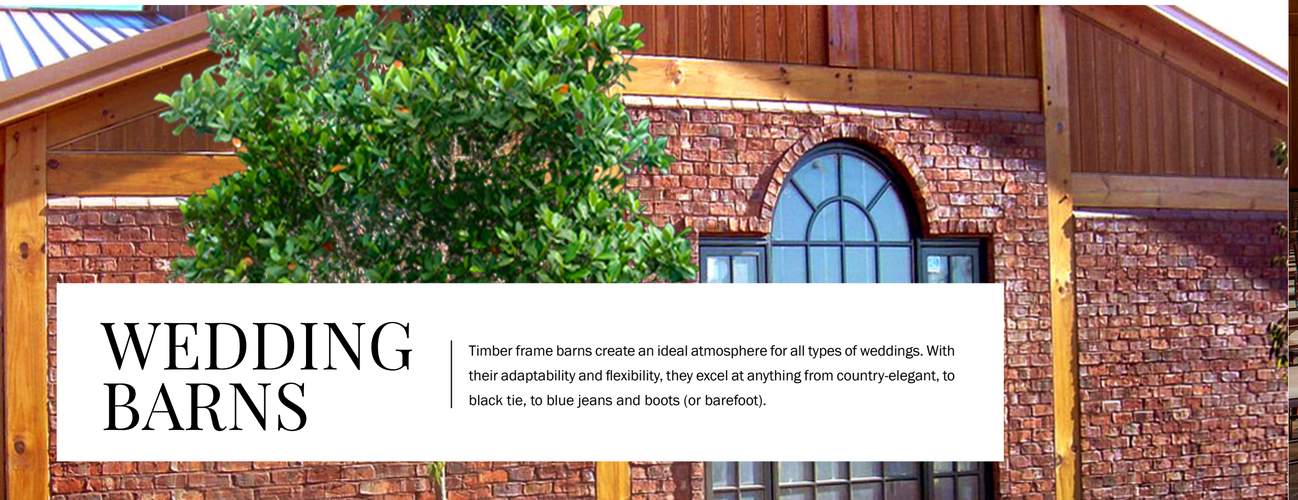

Combining traditional farm home elements such as exposed beams and pitched ceilings with contemporary rustic touches creates a space that is full of character and coziness. People often turn to cottage style barn homes when building a second home or looking to downsize.

WEDDING BARNS

Timber frame barns create an ideal atmosphere for all types of weddings. With their adaptability and flexibility, they excel at anything from country-elegant, to black tie, to blue jeans and boots (or barefoot).

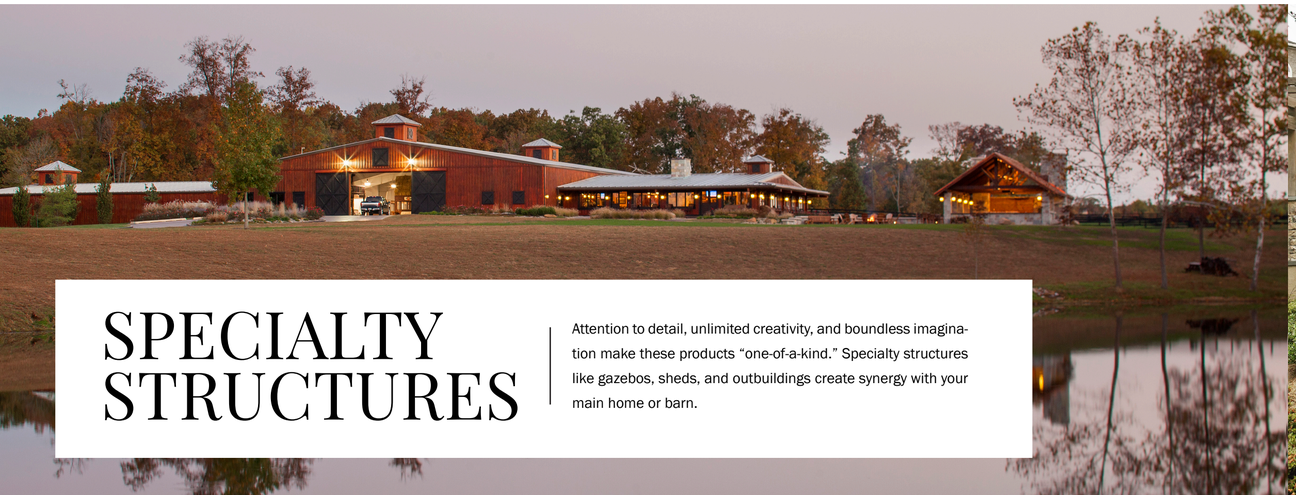

SPECIALTY STRUCTURES

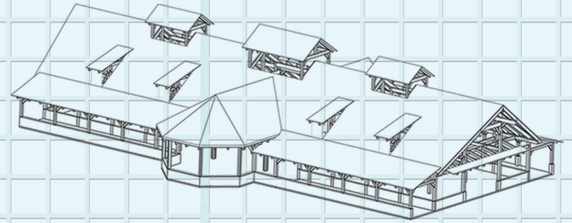

Attention to detail, unlimited creativity, and boundless imagination make these products “one-of-a-kind.” Specialty structures like gazebos, sheds, and outbuildings create synergy with your main home or barn.

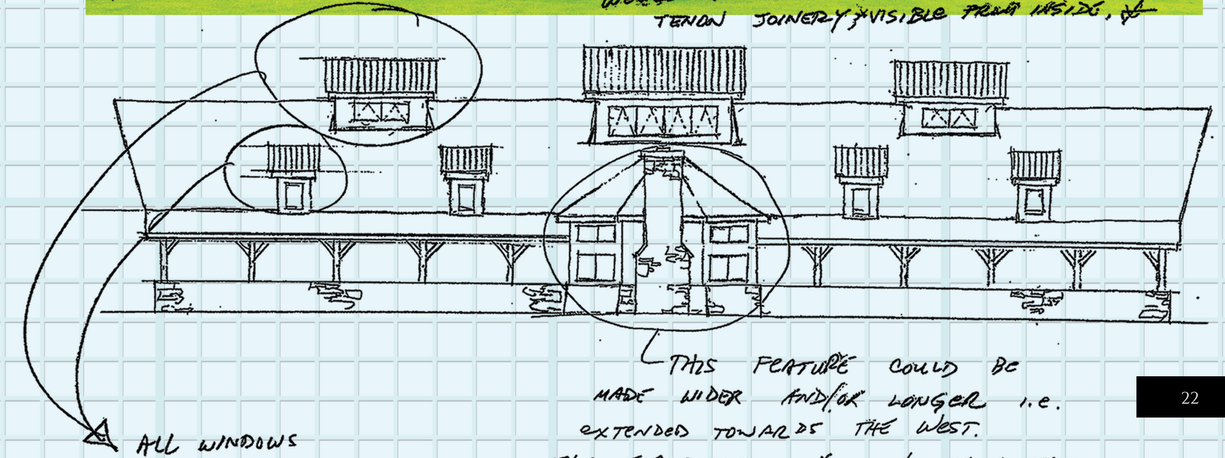

DESIGN SERVICES

Design services include a complete set of blueprints which include cross sections, floor plans, foundation plans, elevations, and additional details for most permit and construction requirements.
