EXTRAORDINARY HOMES

HEARTHSTONE

HISTORY

HEARTHSTONE®

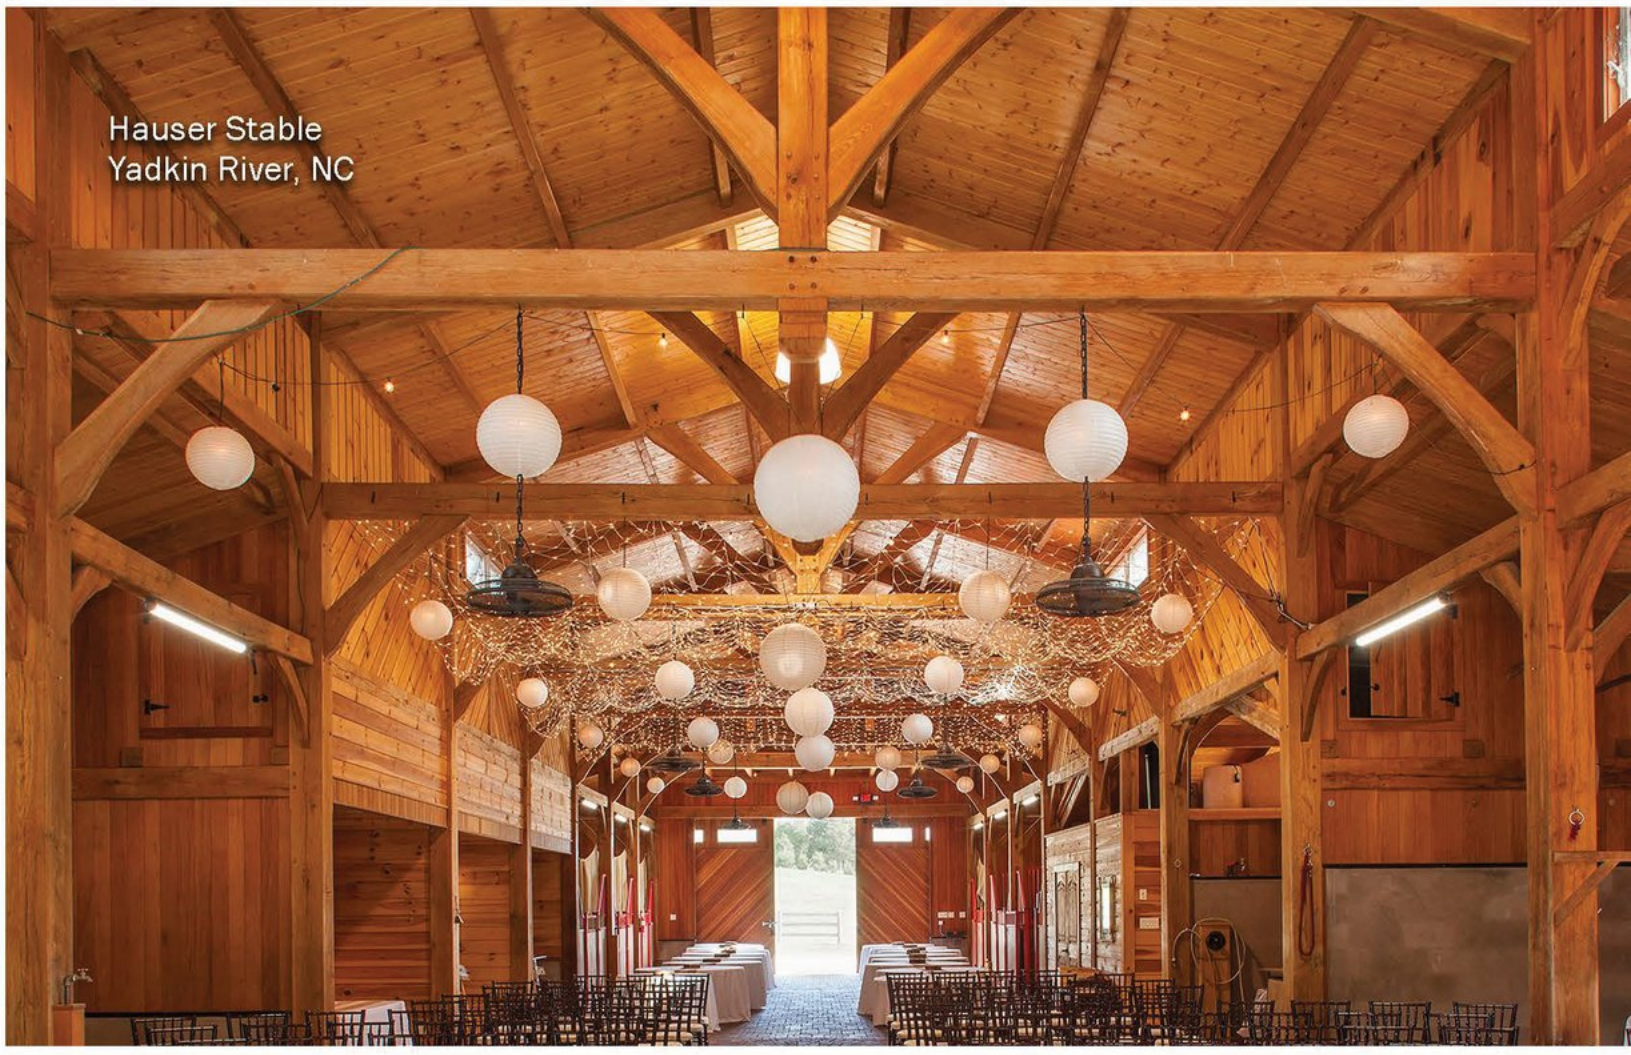

...the log home story.

Hearthstone has been creating extraordinary heavy timber homes since 1971. We began as restorers of 150-200 year old structures, and that heritage still drives us today.

Early in the 1980's, our culture of handcrafting, heavy timber construction, and historical reproduction led us to develop our timber frame homes. Now most of our homes have elements of both log and timber frame construction.

Over the many years and thousands of homes, we have always focused on the art and trade of the Timberwright. We have enough size to focus the appropriate resources on your project, yet we maintain that culture of commitment to the creativity and aesthetics of our TimberWright® forefathers.

Why Hearthstone?

Hearthstone features an unmatched ability to create any imaginable style of custom, luxury, hand crafted heavy-timber or log based home or commercial structure. Nobody in the world has the reputation, capacity and experience — in one company — to deliver as we can.

Ask about our full log and timber frame packages.

RESIDENTIAL & COMMERCIAL TRUSSES

We design, engineer, build, and deliver full timber packages . . . from decorative heavy trusses over a great room to large commercial structures for high profile clients. Worldwide installation services available.
