HEARTHSTONE

Extraordinary Homes

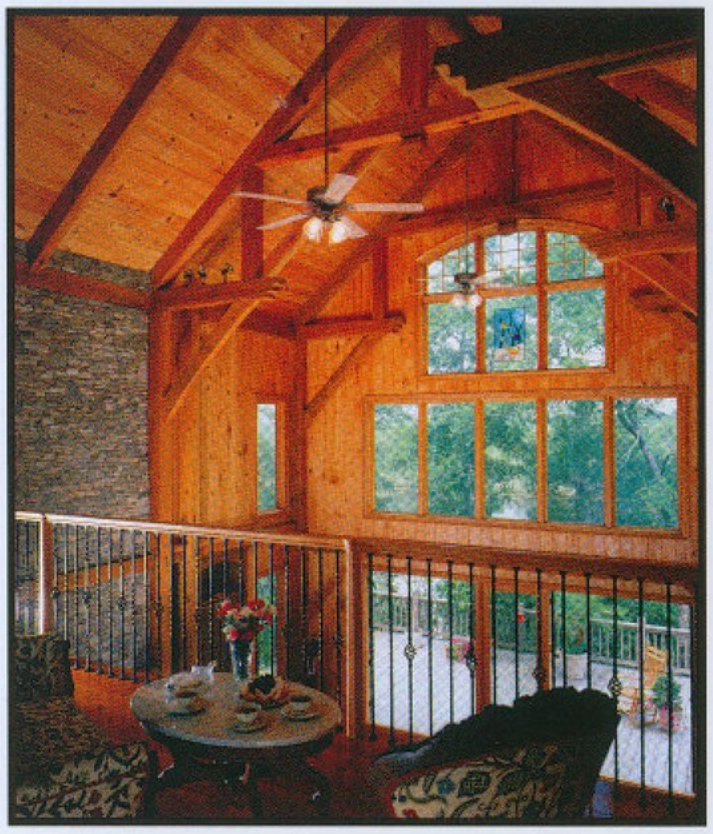

An Unmistakable Commitment to The Nearly Lost Art of The Timberwright

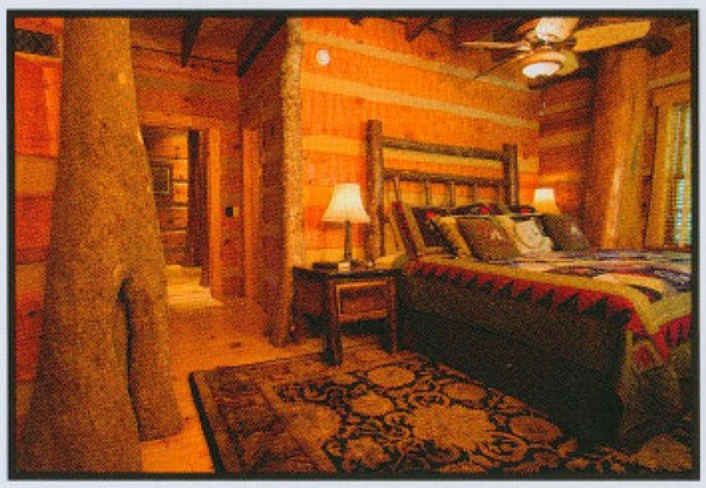

Hearthstone Lifestyle & Living

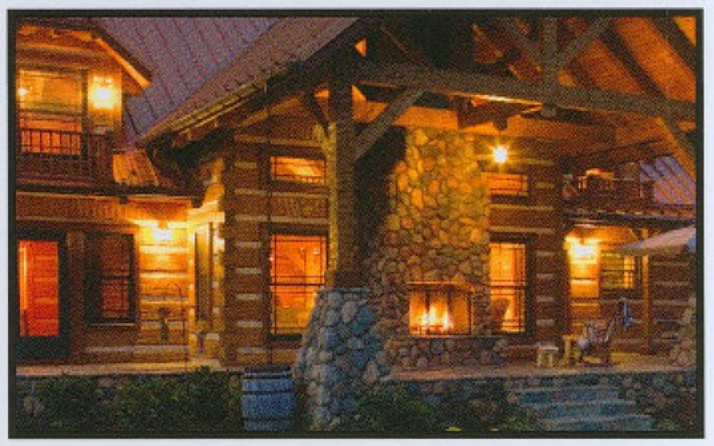

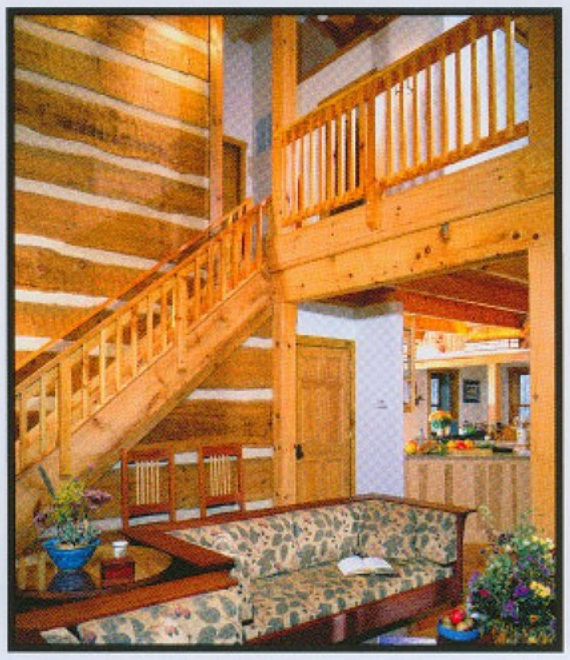

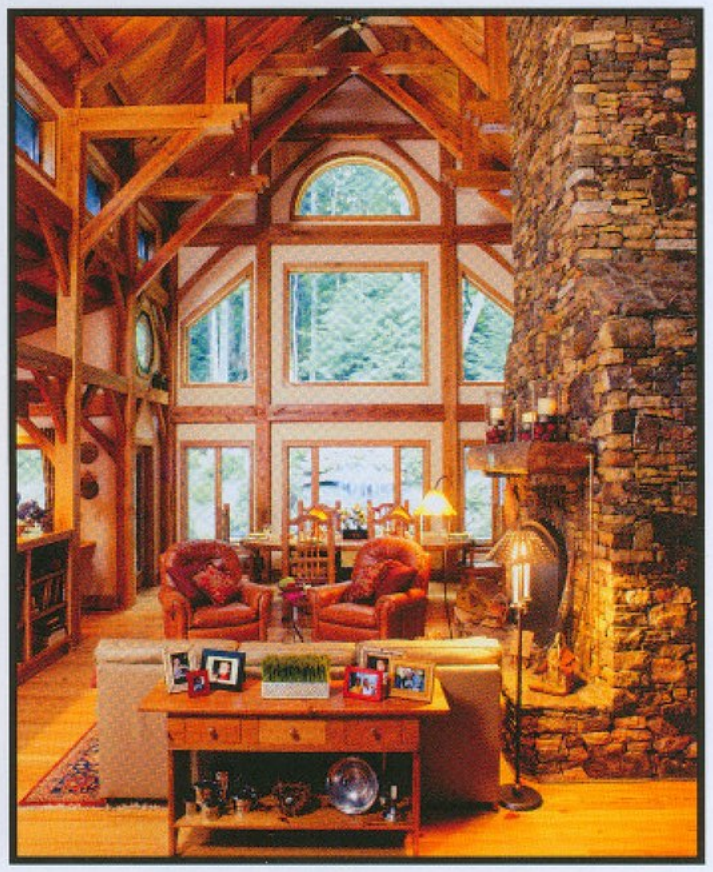

The Founders and Settlers of this country inherited

a centuries old tradition of home building craftsmanship based on log and heavy timber construction. Hearthstone's designers and craftsmen create brand new heart-stopping homes based on the traditional art of those Early American timberwrights. The result is an aesthetically and spiritually superior living environment and the latest in modern comfort and engineering.

A Hearthstone home quietly projects a certain dignity and strength of character that is hard to describe. We take great pride in presenting to you the finest collection of log and timber frame homes in the world.

Log Homes

Hearthstone was founded in 1971

as a restorer of ancient log homes. We then developed a log home which looks much like those 200 year old structures, yet with substantial and continually evolving technical

improvements. These homes feature logs of long lengths, dovetail corners, hewn or planed finishes, irregular chamfered edges, and a modern chinking and settling system. They have satisfied thousands of world-wide customers with both aesthetic and technical excellence. These are the homes that made Hearthstone famous.

Timber Frame Homes

Timber Frames are built with massive timbers and hand-crafted variations of

pegged mortise-and-tenon joinery. This beautiful oak frame is planed, sanded, and left exposed on the interior of the home–creating a breathtaking effect of open spaces and craftsmanship rarely seen in this century. The exterior of the frame is covered with a highly energy-efficient blanket of foam core panels. The result is a home of unmatched beauty, value, energy efficiency, and design flexibility.

The Bob Timberlake® Log Home collection

In the 1990's, Hearthstone teamed with renowned artist

and log home afficionado Bob Timberlake to develop The Bob Timberlake® Log Home Collection. These homes

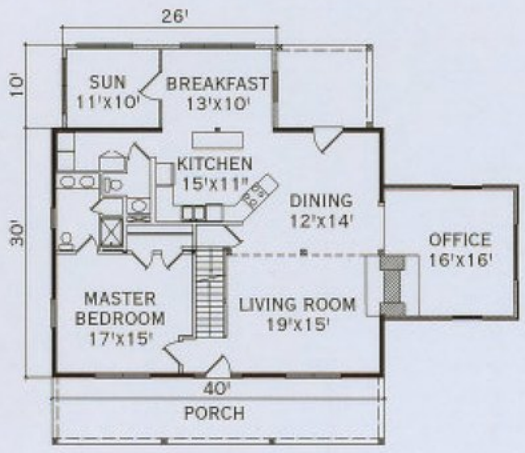

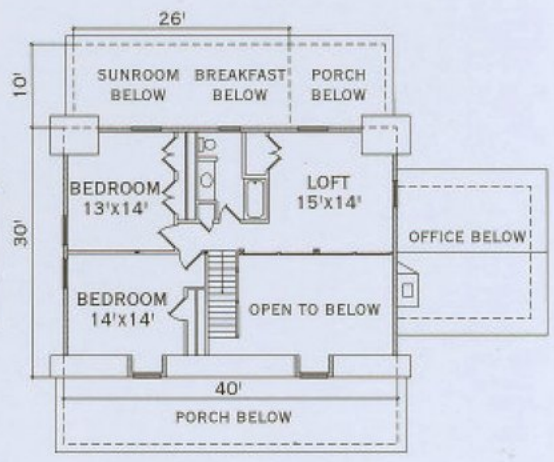

feature massive, naturally shaped logs hewn on two sides, dovetail corners, and nearly perfect reproduction of the look and feel of those 200 year old log homes. A Timberlake home takes more attention from both our timberwrights and our foresters, but the result is a truly stunning masterpiece of permanent folk architecture.
